

Name: Shaik Ashraf

Reg No: 192324088

Course&Code : CSA1522 Cloud Computing & Big Data

EXP NO 1: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR FLIGHT RESERVATION SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

Aim:

To create a simple cloud software application for Flight Reservation System using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure:

Step 1: Go to www.zoho.com.

Step 2: Log in to your Zoho account.

Step 3: Open **Zoho Creator** and select **Create New Application**.

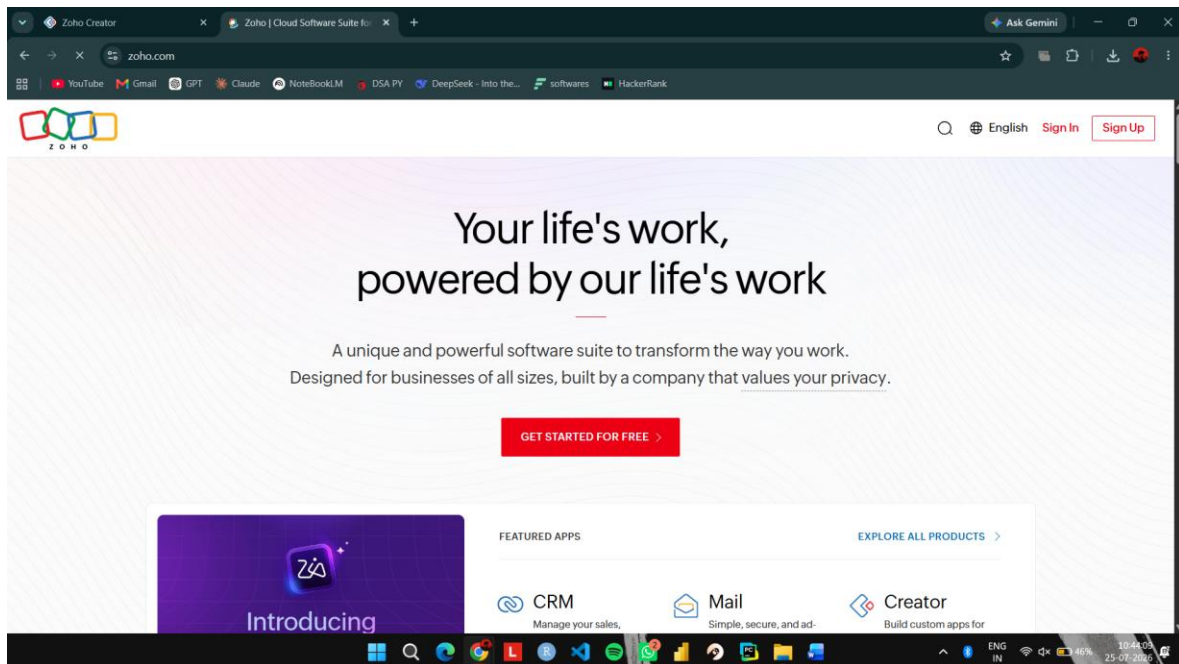

Step 4: Enter the application name as **Flight Reservation System**.

Step 5: Create the required forms, reports, and a basic dashboard for the Flight Reservation System.

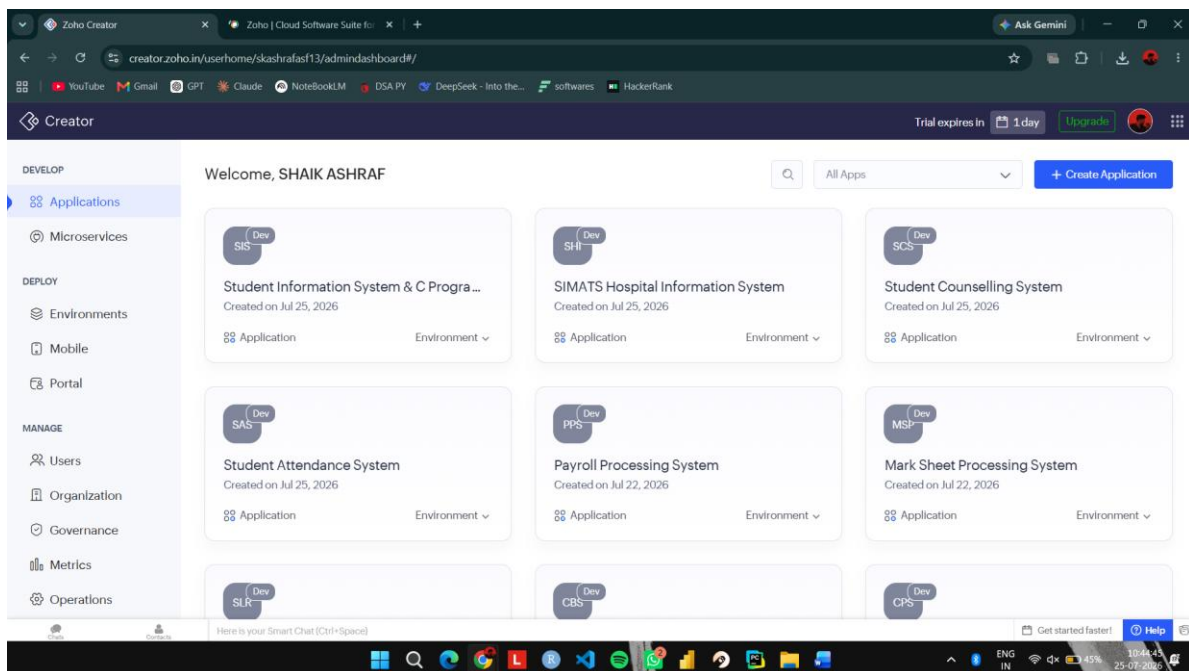

Step 6: Save and publish the application. The software has been created successfully.

IMPLEMENTATION:

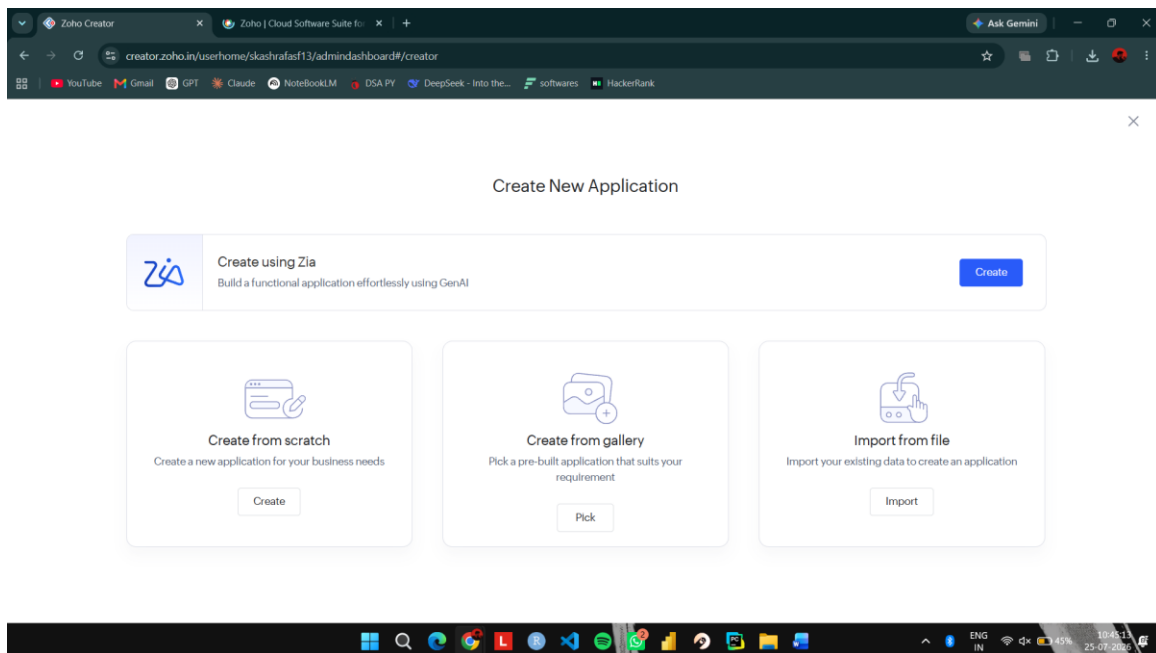

Step 1: Go to www.zoho.com

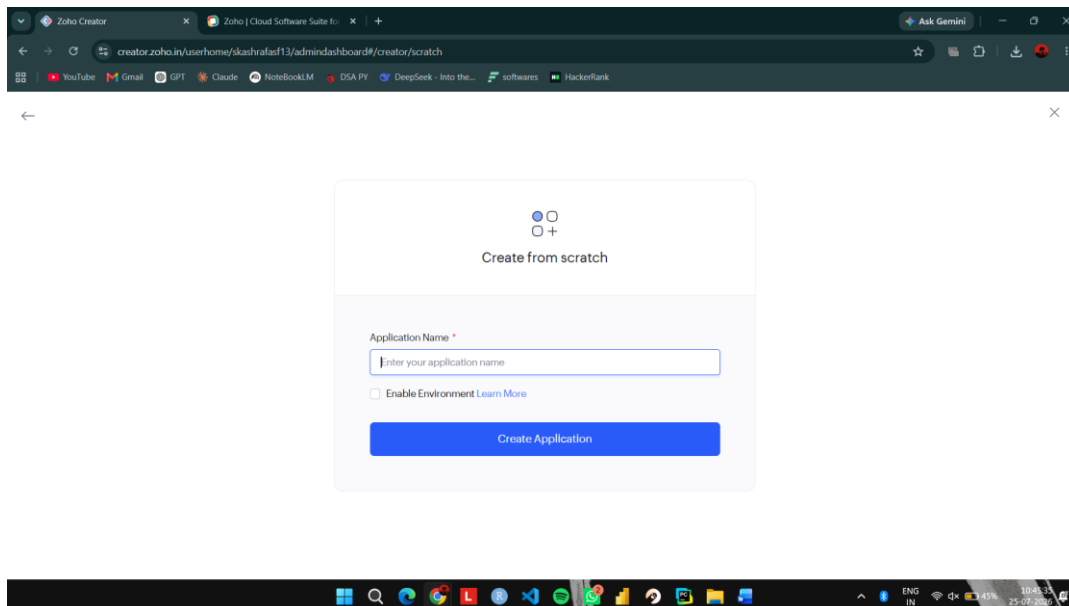

Step 2: Log in to your Zoho account.

Step 3: Open Zoho Creator and select Create New Application.

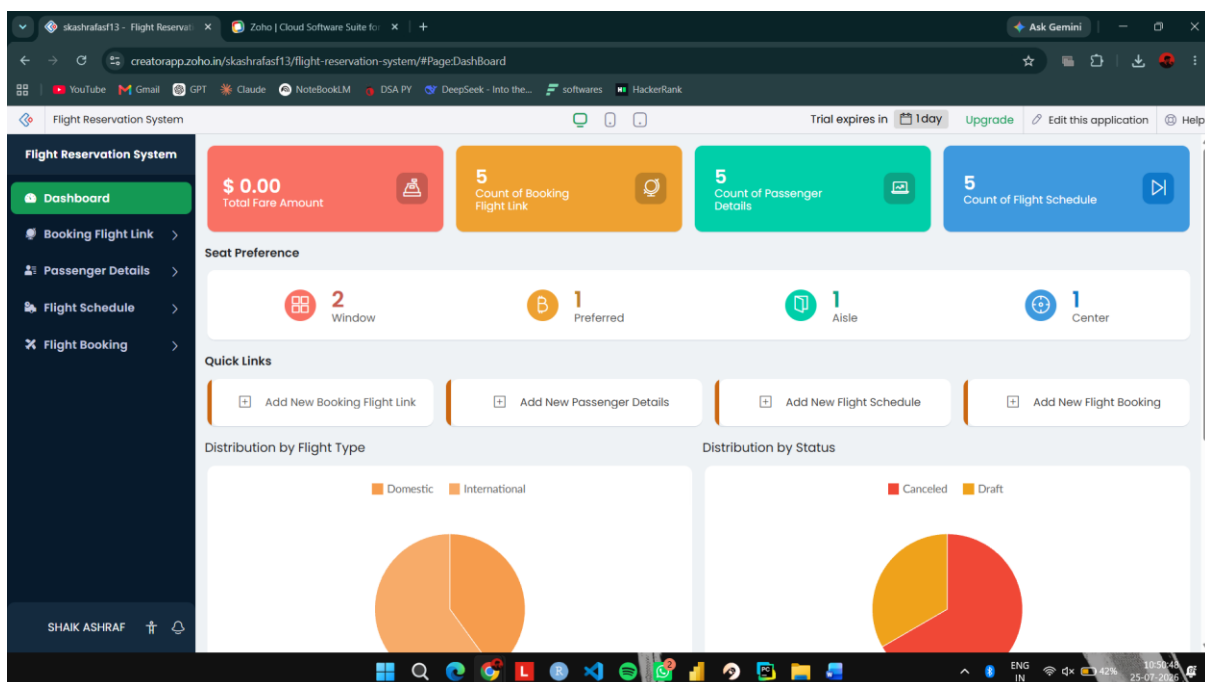

Step 4: Enter the application name as Mark Sheet Processing System.

Step 5: Create the required forms, reports, and a basic dashboard for the Flight Reservation System.

The screenshot shows the Zoho Creator form editor for a form titled "Student Details". On the left, there is a "Basic Fields" panel with various field types: Name, Email, Address, Phone, Single Line, Multi Line, Number (with value 123), Date (with value 15), Time, Drop Down, Radio, and Multi Select. The main area displays a list of fields for the form: Auto Number, Student Name, Register Number, Gender, Department, Course, Year, Section, Email, and Mobile Number. On the right, the "Field Properties" panel is visible, showing settings for the selected "Auto Number" field, including Field name, Field link name, Validation (Start Index: 1), and Appearance (Field type: Auto Number).

Step 6: Save and publish the application. The software has been created successfully.

EXP NO 2: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR PROPERTY BUYING & RENTAL PROCESS USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

Aim:

To create a simple cloud software application for Property Buying & Rental Process using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure:

Step 1: Go to www.zoho.com.

Step 2: Log in to your Zoho account.

Step 3: Open **Zoho Creator** and select **Create New Application**.

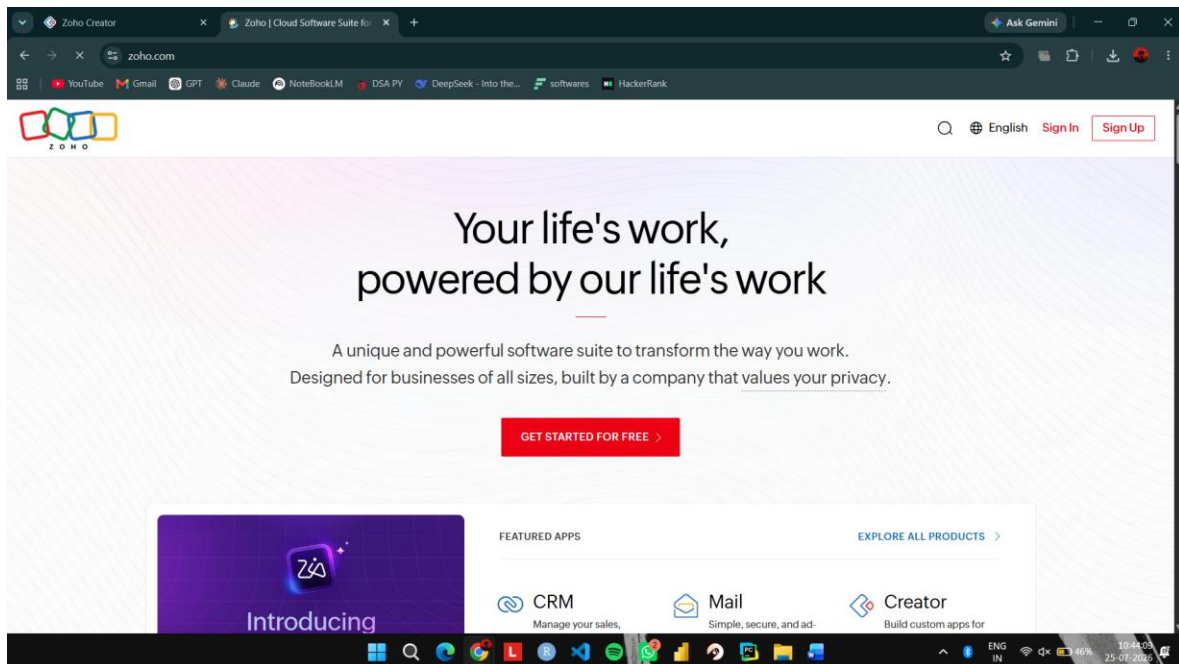

Step 4: Enter the application name as **Property Buying & Rental Process**.

Step 5: Create the required forms, reports, and a basic dashboard for property buying and rental management.

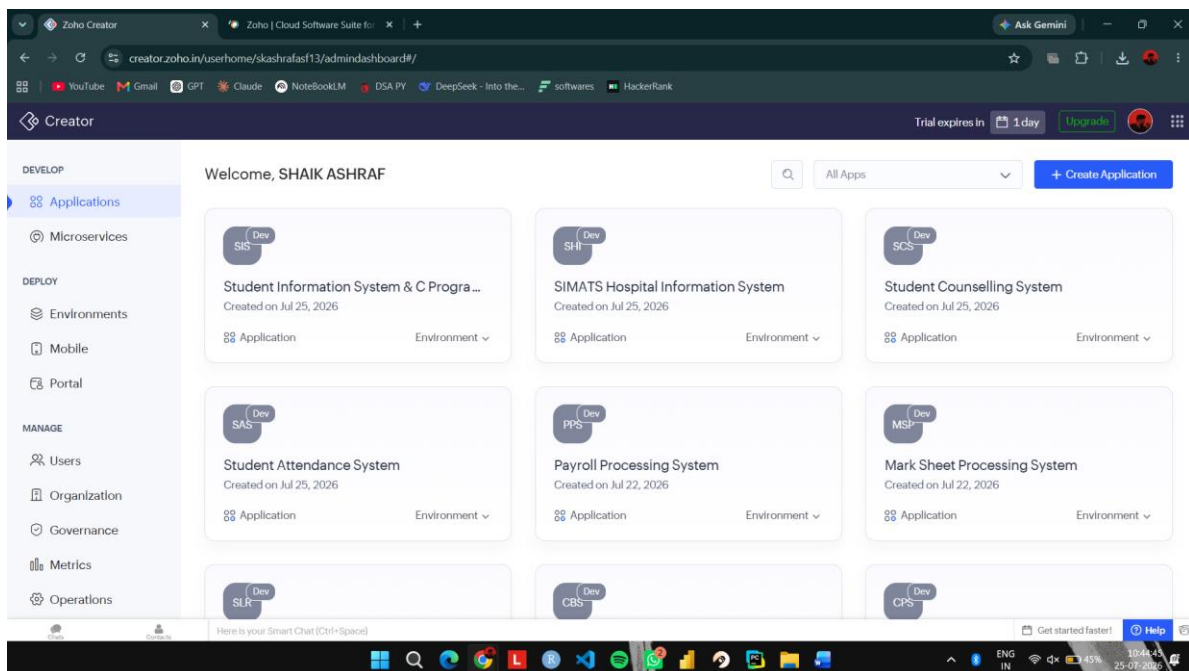

Step 6: Save and publish the application. The software has been created successfully.

IMPLEMENTATION:

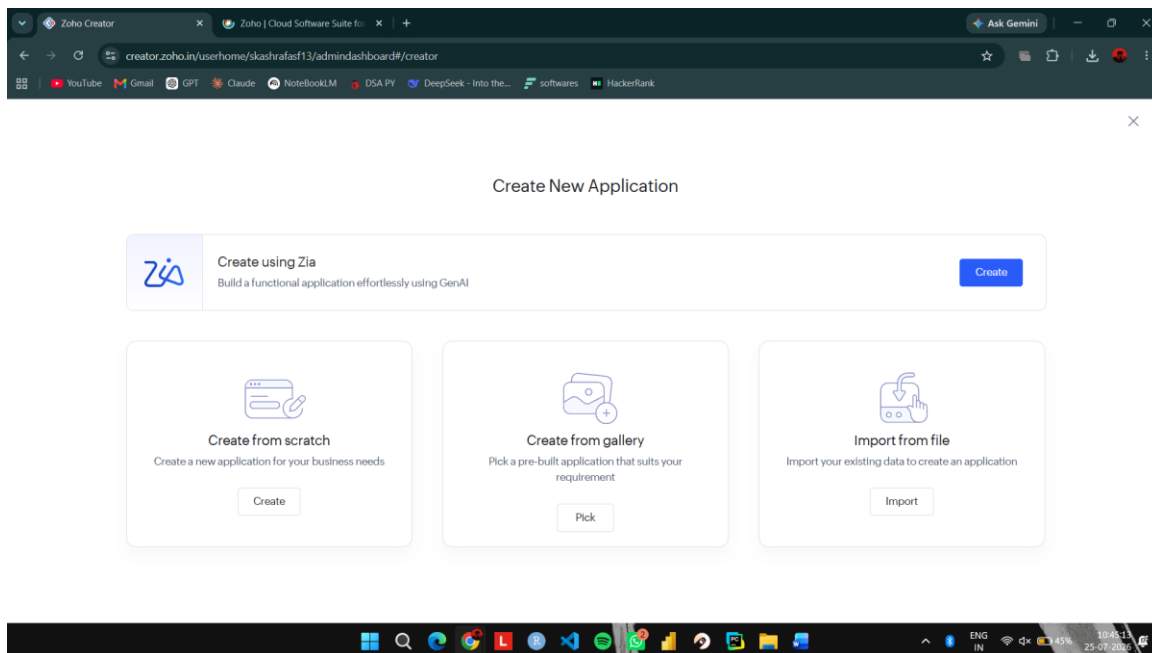

Step 1: Go to www.zoho.com

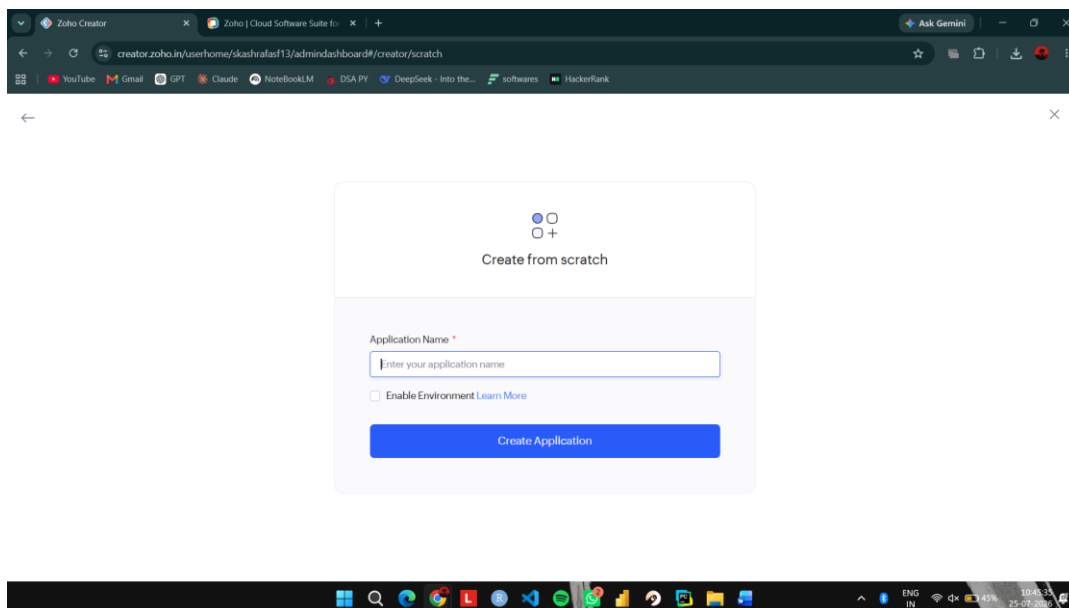

Step 2: Log in to your Zoho account.

Step 3: Open Zoho Creator and select Create New Application.

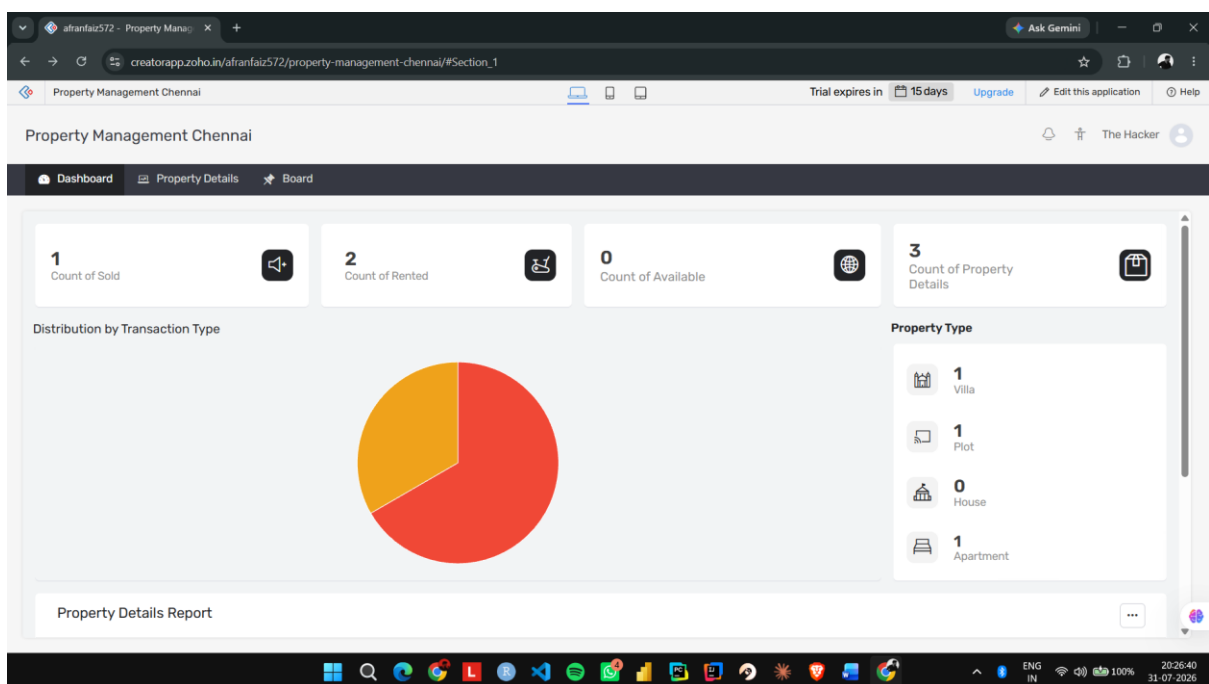

Step 4: Enter the application name as Mark Sheet Processing System.

Step 5: Create the required forms, reports, and a basic dashboard for property buying and rental management.

The screenshot shows the Zoho Creator 'Property Details' form builder. On the left, a 'Basic Fields' panel offers icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, and Drop Down. The main workspace contains a form with fields: Property Name, Owner Name, Contact Number, Property Type, Transaction Type, Location, Area, Price, Bedrooms, and Availability. On the right, the 'Field Properties' panel for 'Property Name' shows settings for field name, link name, validation (Mandatory, No duplicate values), initial value, character maximum (255), and data privacy (Contains personal data).

Step 6: Save and publish the application. The software has been created successfully.

EXP NO 3: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR CAR BOOKING RESERVATION SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

Aim:

To create a simple cloud software application for **Car Booking Reservation System** using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure:

Step 1: Go to www.zoho.com.

Step 2: Log in to your Zoho account.

Step 3: Open **Zoho Creator** and select **Create New Application**.

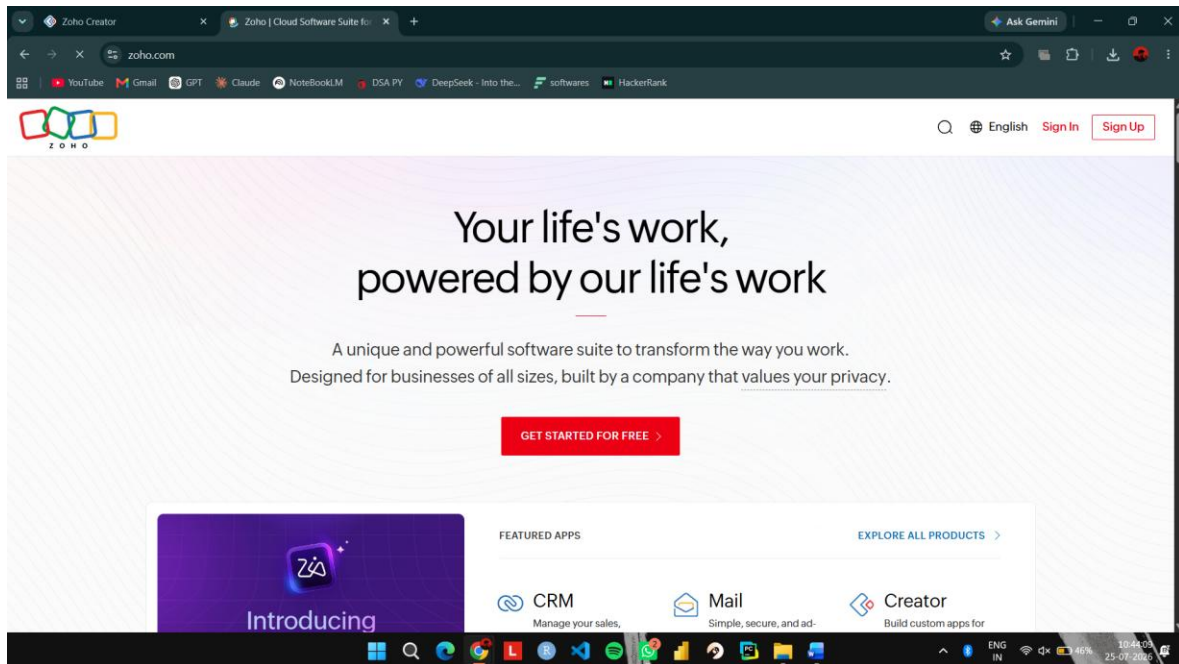

Step 4: Enter the application name as **Car Booking Reservation System**.

Step 5: Create the required forms, reports, and a basic dashboard for car booking.

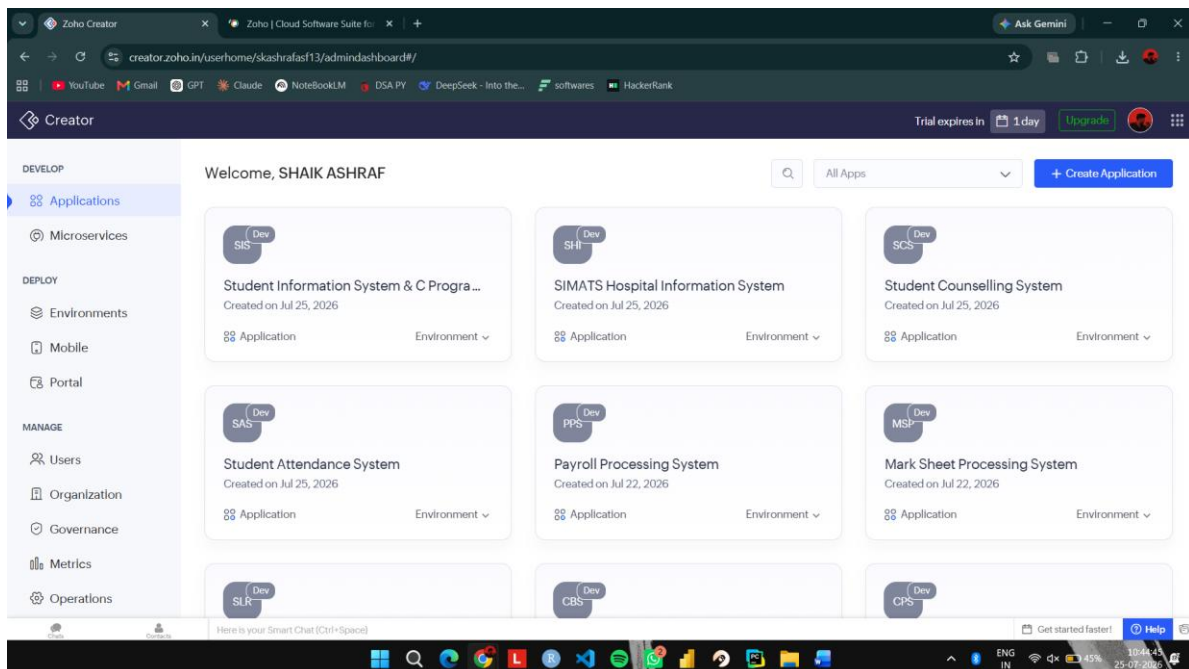

Step 6: Save and publish the application. The software has been created successfully.

IMPLEMENTATION:

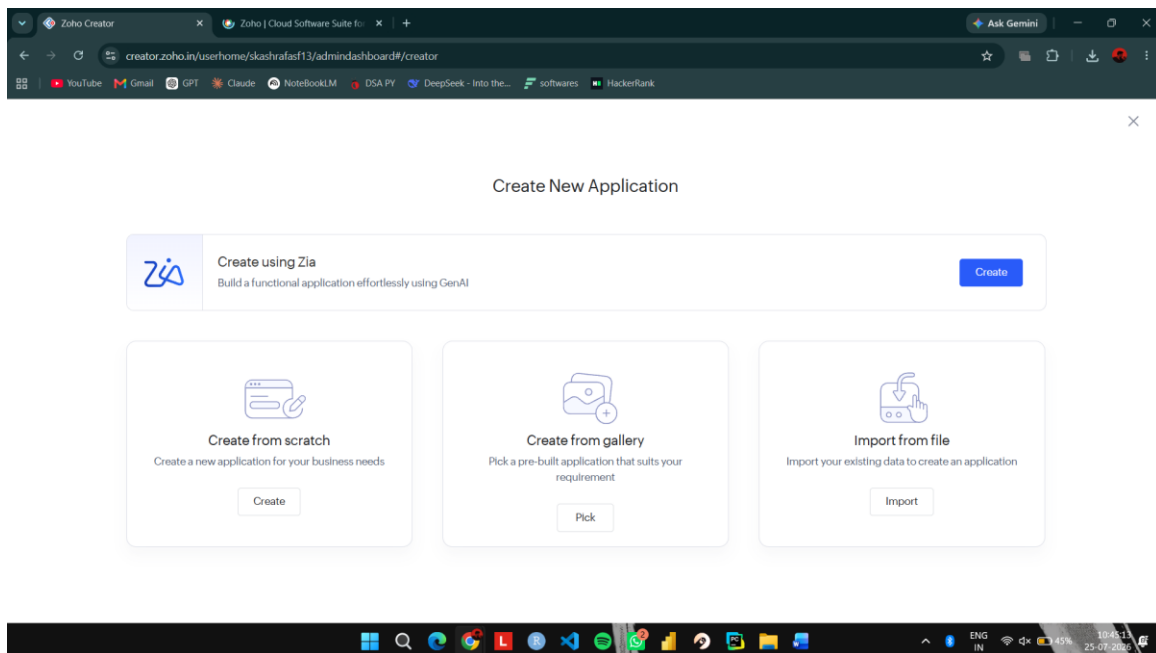

Step 1: Go to www.zoho.com

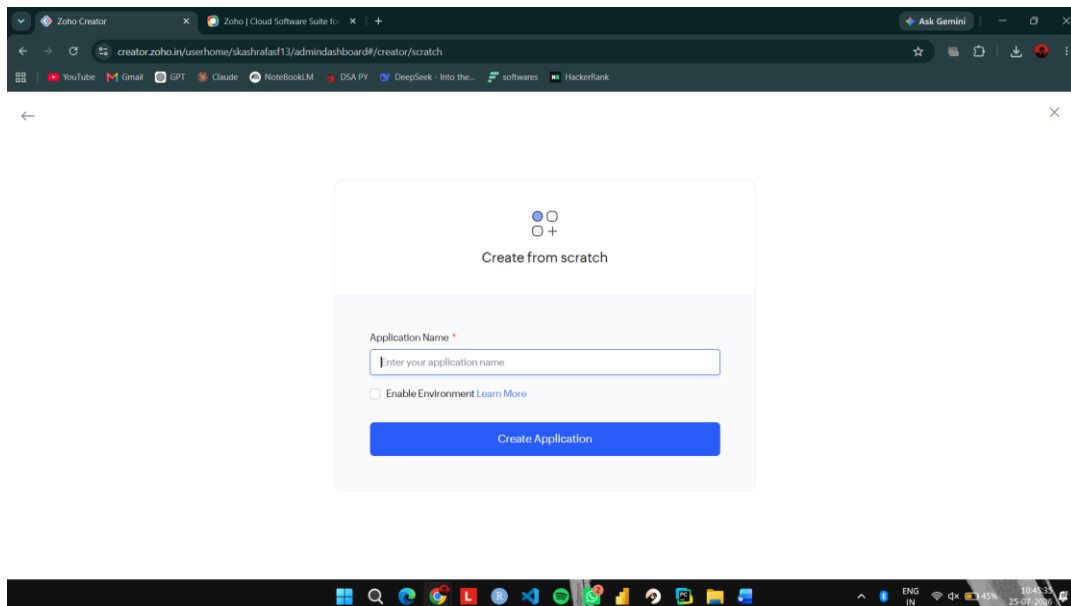

Step 2: Log in to your Zoho account.

Step 3: Open Zoho Creator and select Create New Application.

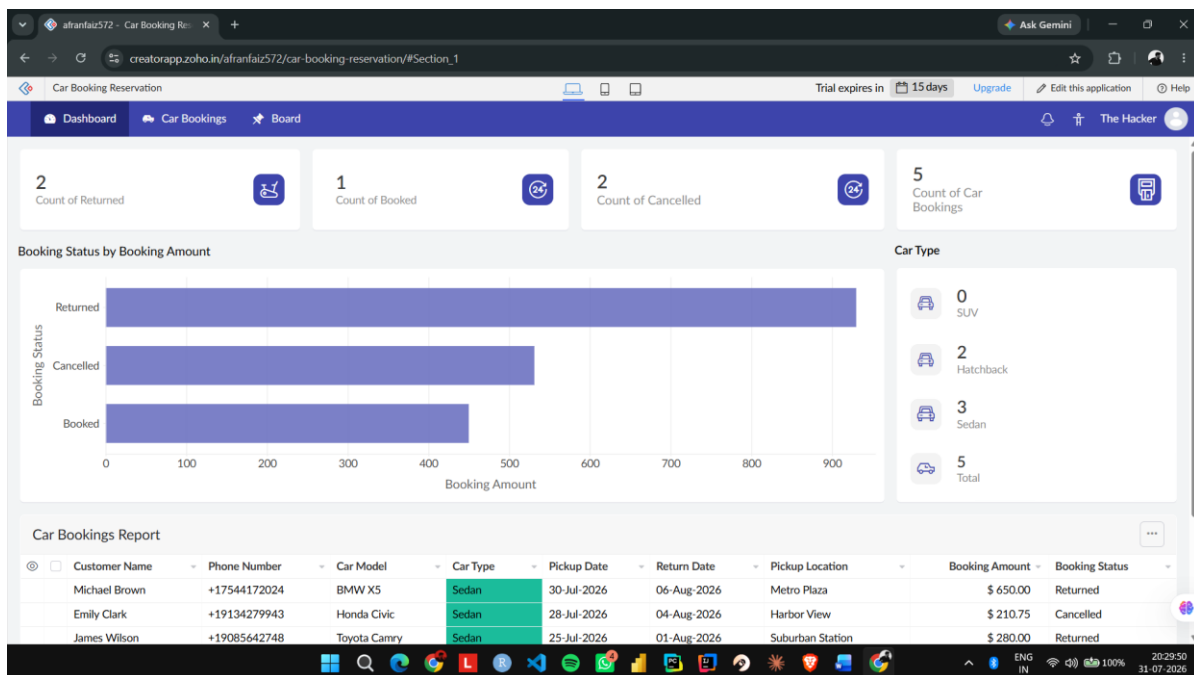

Step 4: Enter the application name as Mark Sheet Processing System.

Step 5: Create the required forms, reports, and a basic dashboard for car booking.

The screenshot shows the Zoho Creator form builder interface for a 'Car Booking Reservation' application. The 'Basic Fields' panel on the left lists various field types: Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, and Drop Down. The main form area contains the following fields: Customer Name, Phone Number, Car Model, Car Type, Pickup Date, Return Date, Pickup Location, Booking Amount, and Booking Status. The 'Field Properties' panel on the right shows settings for the 'Customer Name' field, including its name, link name, validation rules, initial value, character maximum, and data privacy settings.

Step 6: Save and publish the application. The software has been created successfully.

EXP NO 4: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR LIBRARY BOOK RESERVATION SYSTEM FOR SIMATS LIBRARY USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

Aim:

To create a simple cloud software application for **Library Book Reservation System for SIMATS Library** using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure:

Step 1: Go to www.zoho.com.

Step 2: Log in to your Zoho account.

Step 3: Open **Zoho Creator** and select **Create New Application**.

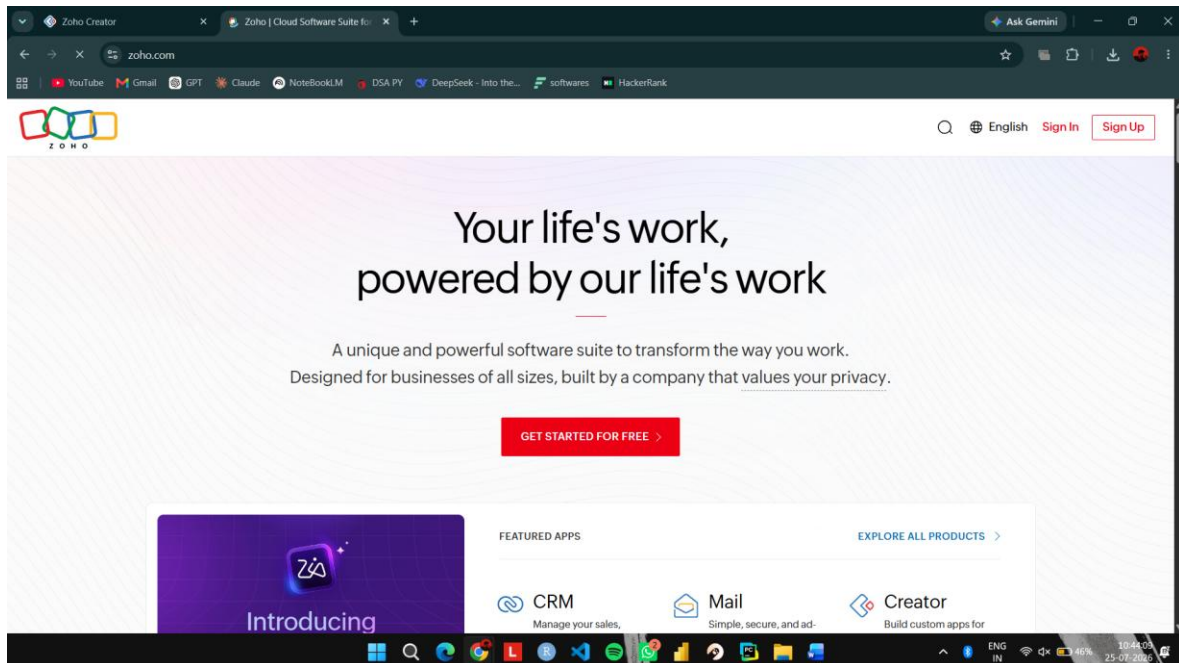

Step 4: Enter the application name as **Library Book Reservation System**.

Step 5: Create the required forms, reports, and a basic dashboard for library book reservation.

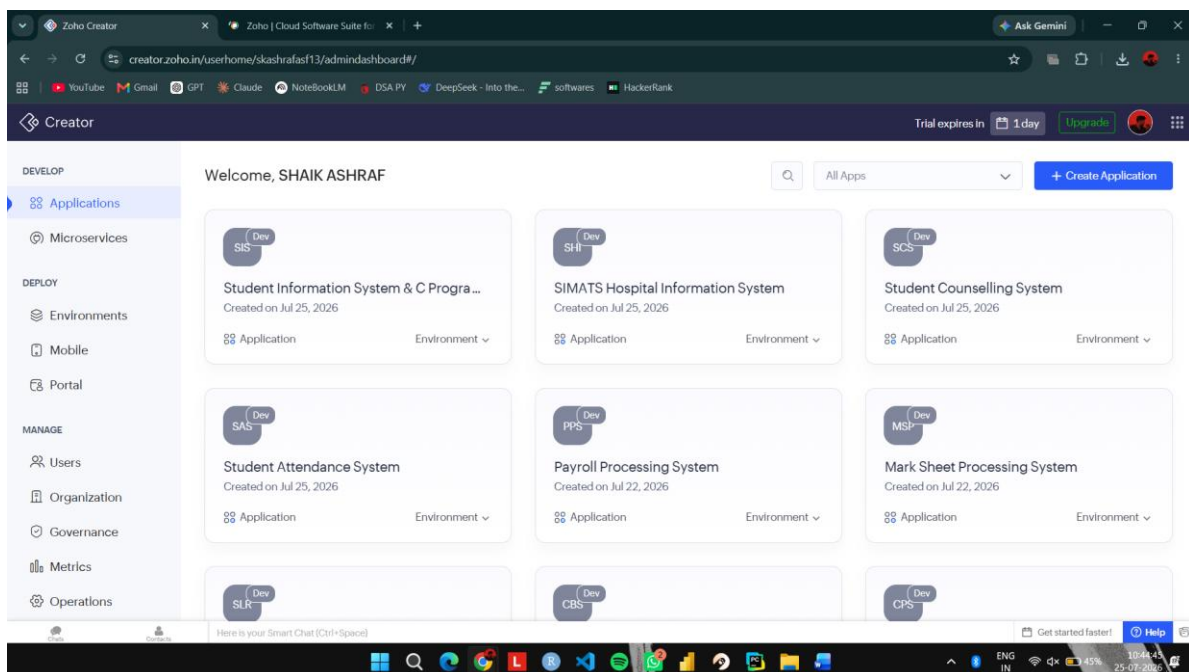

Step 6: Save and publish the application. The software has been created successfully.

IMPLEMENTATION:

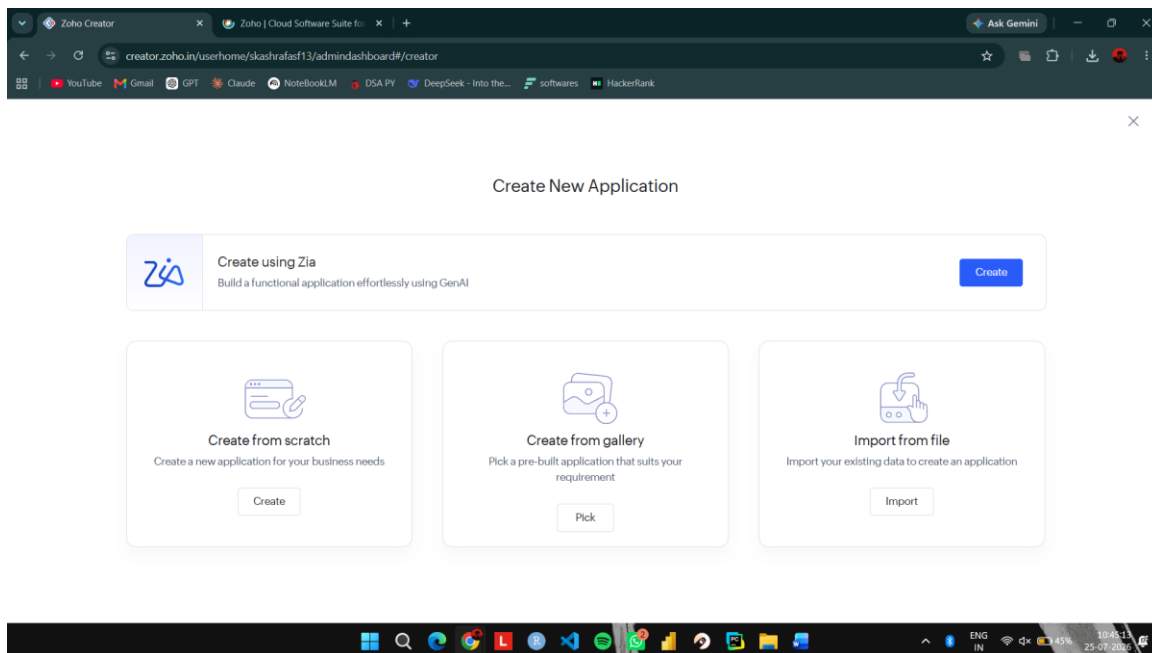

Step 1: Go to www.zoho.com

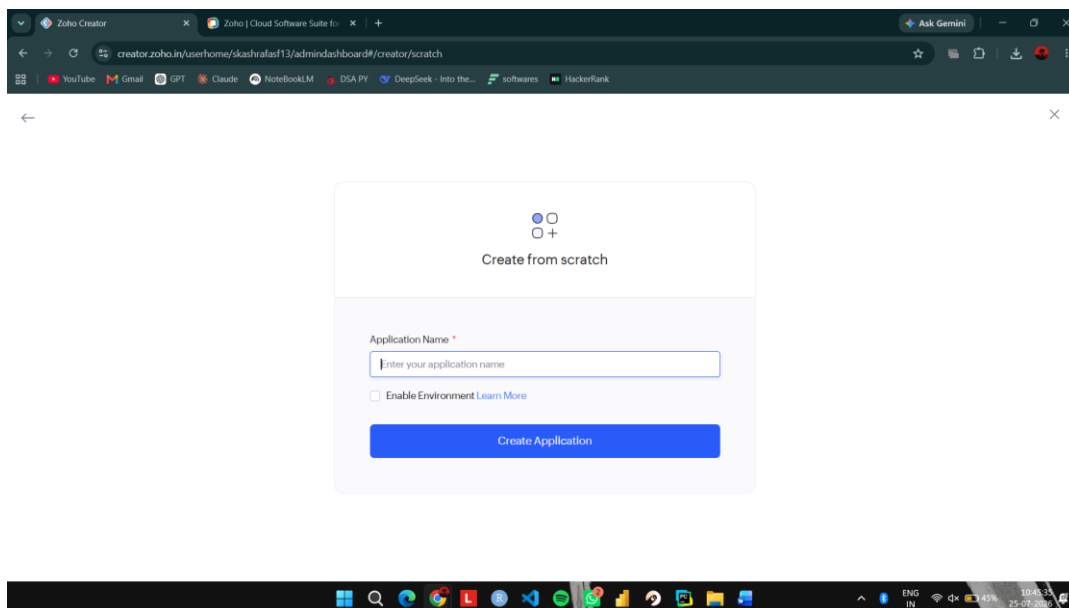

Step 2: Log in to your Zoho account.

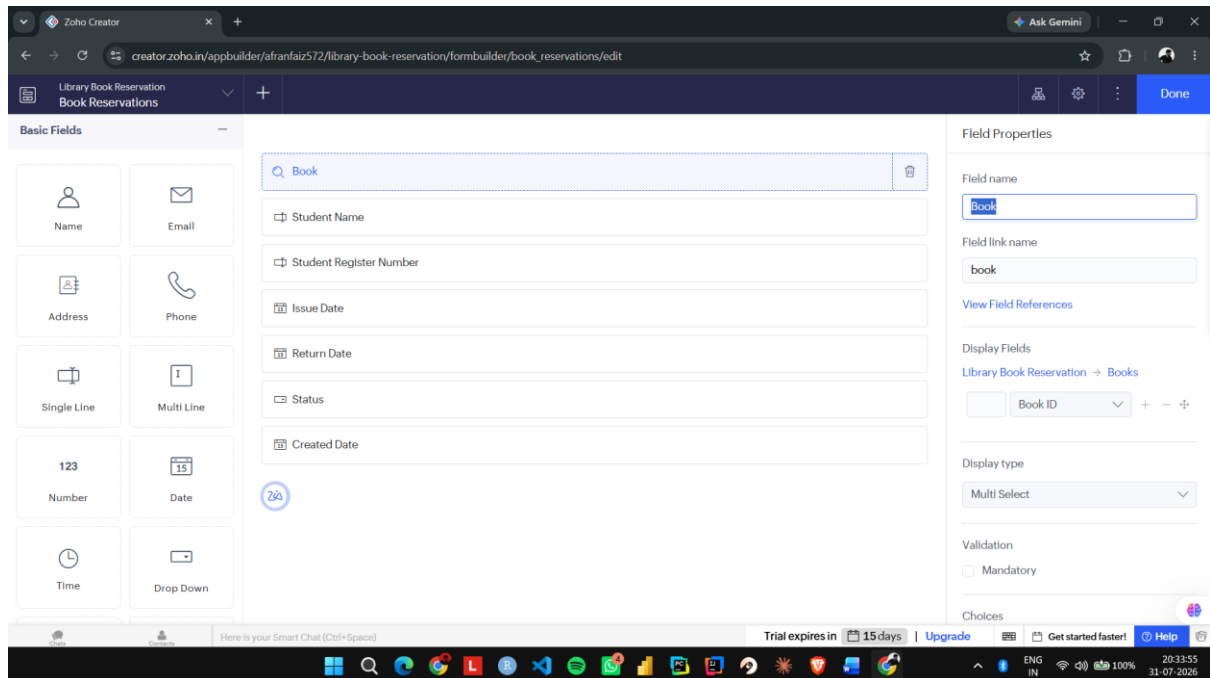

Step 3: Open Zoho Creator and select Create New Application.

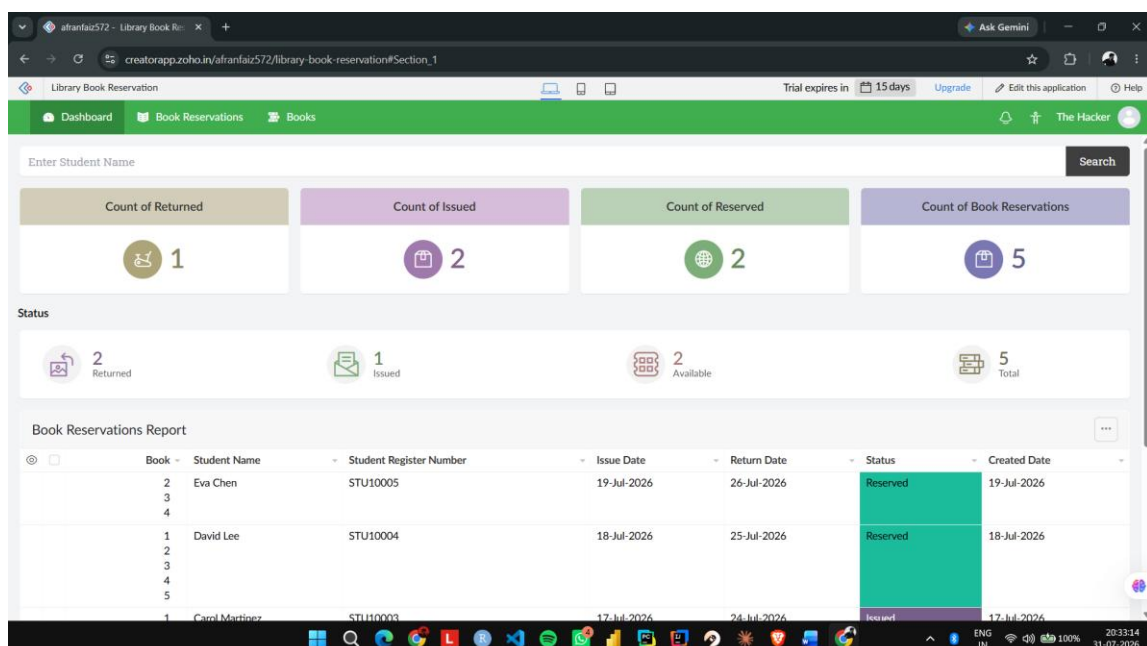

Step 4: Enter the application name as Mark Sheet Processing System.

Step 5: Create the required forms, reports, and a basic dashboard for library book reservation.

Step 6: Save and publish the application. The software has been created successfully.

EXP NO 5: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR MARK SHEET PROCESSING SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

Aim:

To create a simple cloud software application for Mark Sheet Processing System using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure:

Step 1: Go to www.zoho.com.

Step 2: Log in to your Zoho account.

Step 3: Open **Zoho Creator** and select **Create New Application**.

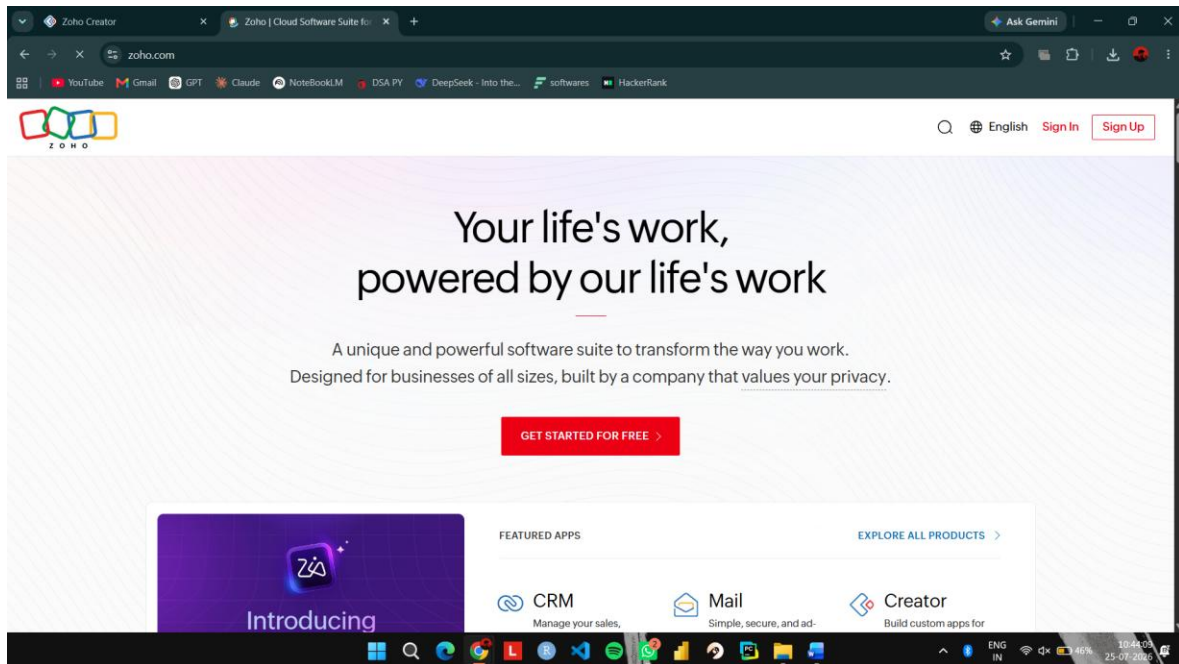

Step 4: Enter the application name as **Mark Sheet Processing System**.

Step 5: Create the required forms, reports, and dashboard.

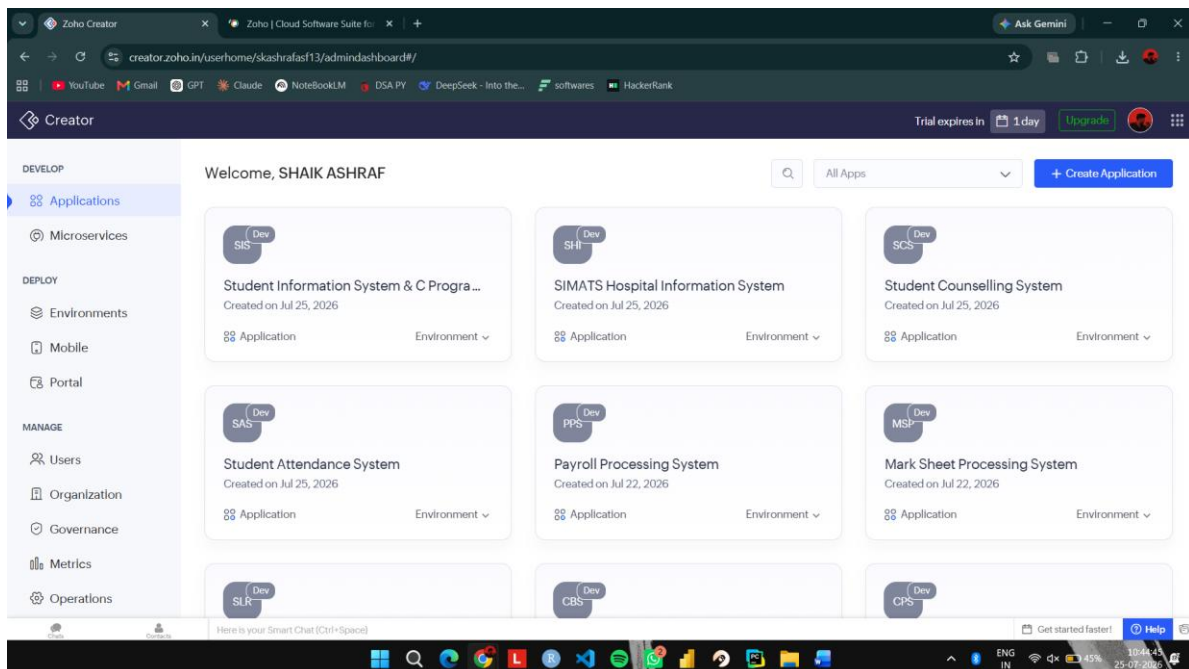

Step 6: Save and publish the application. The software has been created successfully.

IMPLEMENTATION:

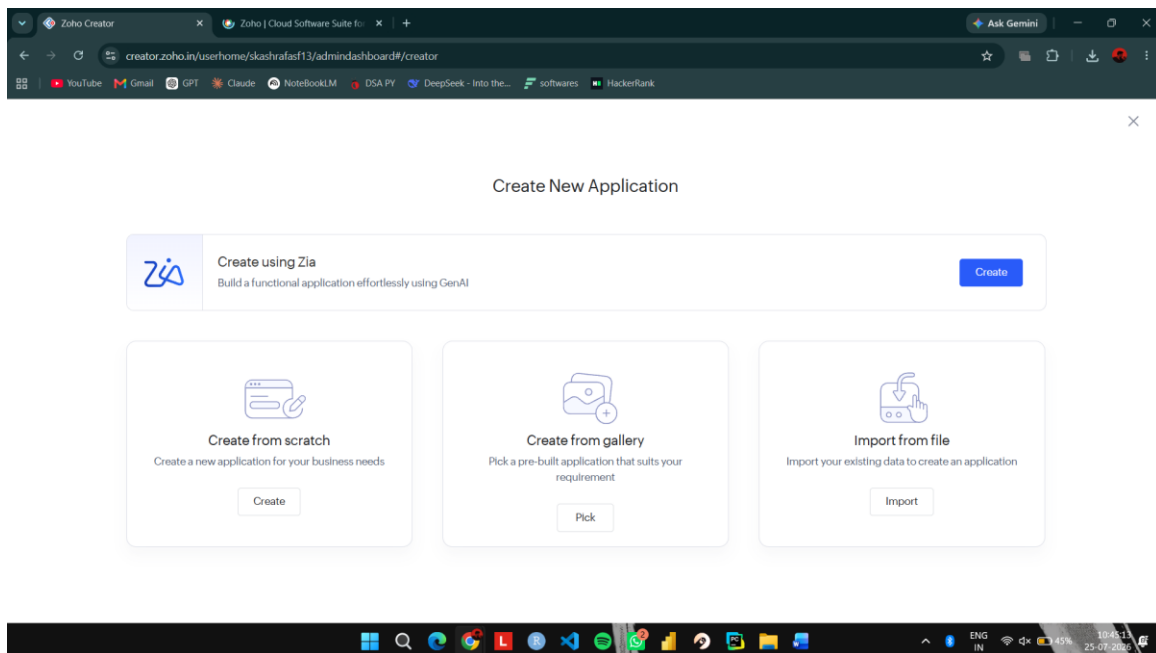

Step 1: Go to www.zoho.com

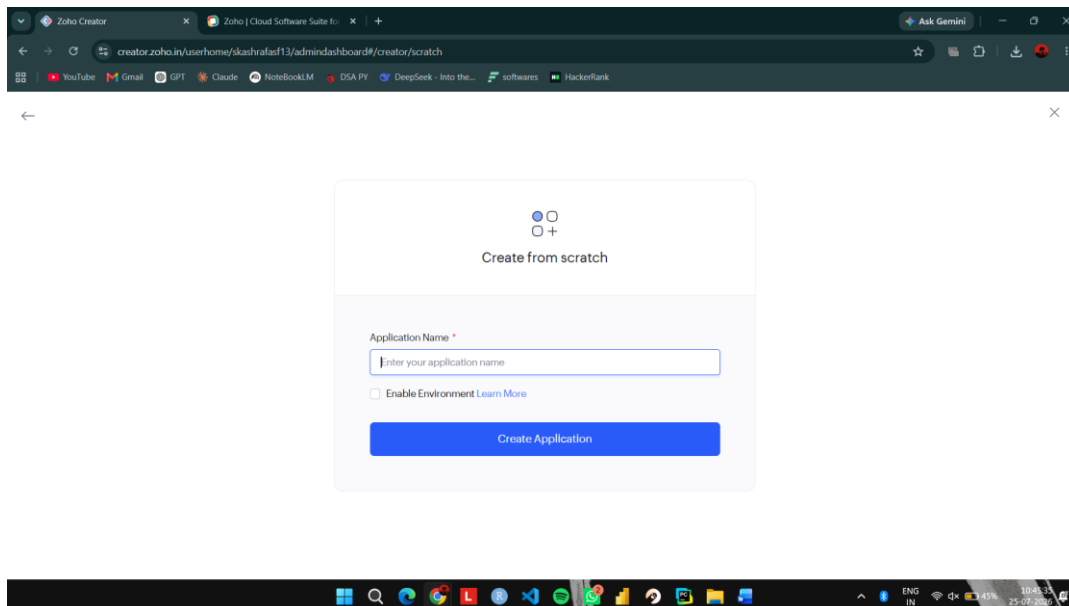

Step 2: Log in to your Zoho account.

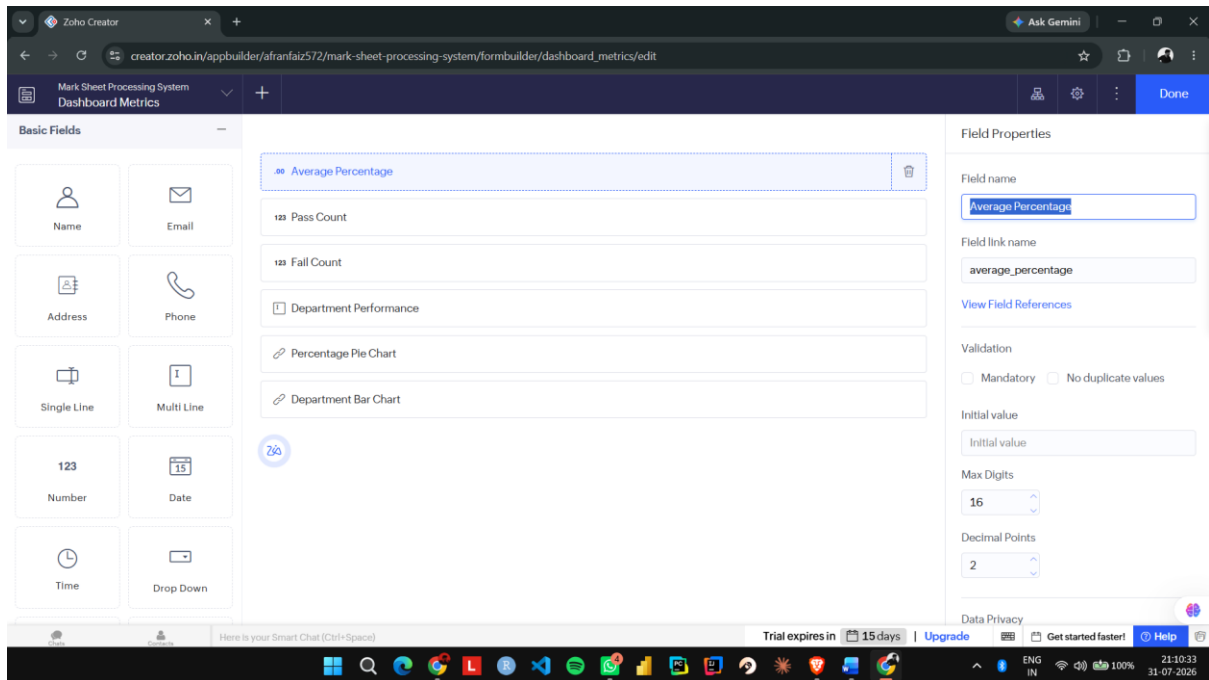

Step 3: Open Zoho Creator and select Create New Application.

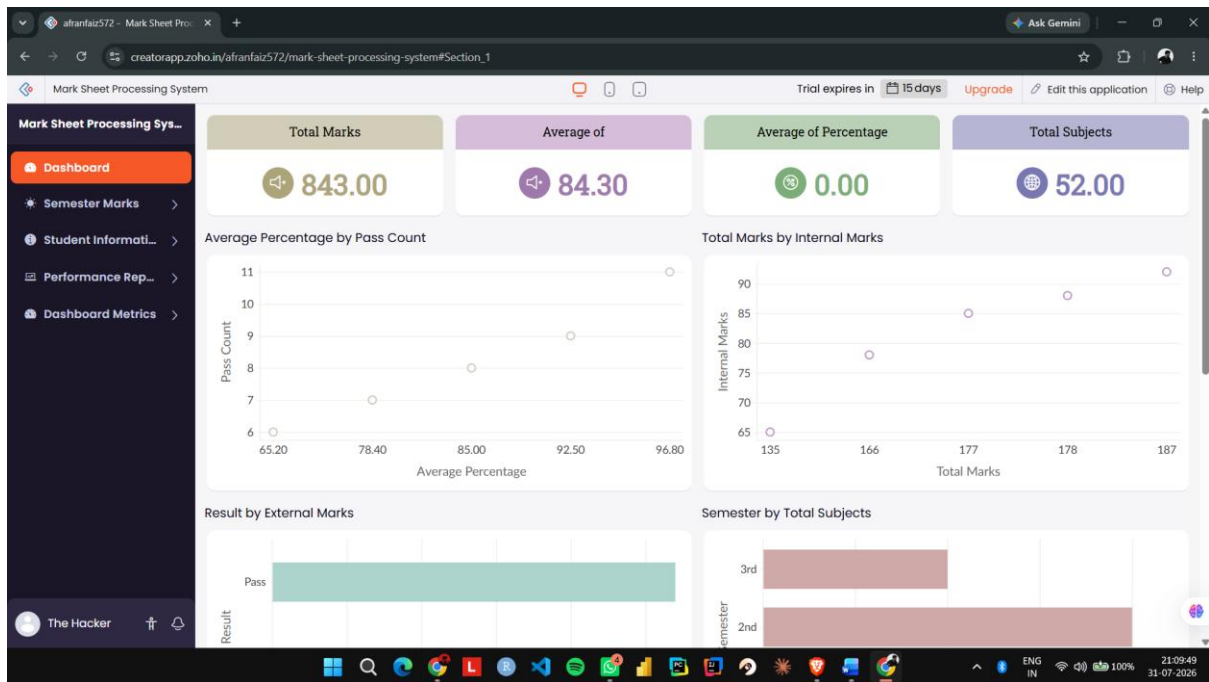

Step 4: Enter the application name as Mark Sheet Processing System.

Step 5: Create the required forms, reports, and dashboard.

Step 6: Save and publish the application. The software has been created successfully.

EXP NO 6: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR PAYROLL PROCESSING SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

Aim:

To create a simple cloud software application for Payroll Processing System using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure:

Step 1: Go to www.zoho.com.

Step 2: Log in to your Zoho account.

Step 3: Open Zoho Creator and select Create New Application.

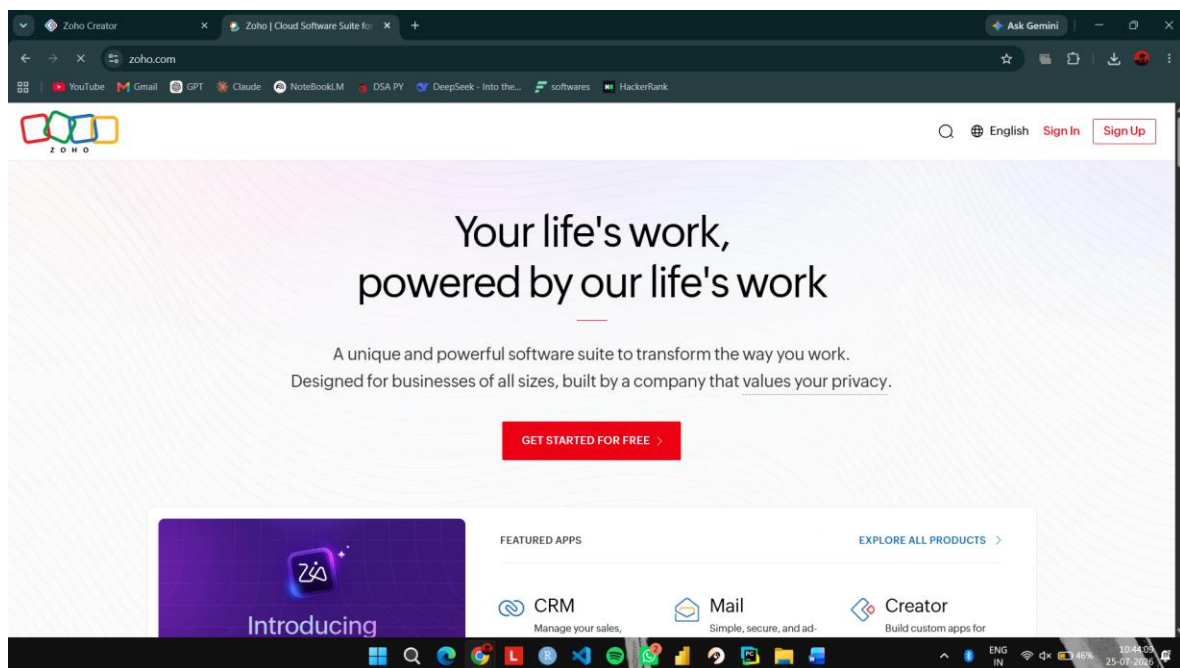

Step 4: Enter the application name as Payroll Processing System.

Step 5: Create the required forms, reports, and dashboard.

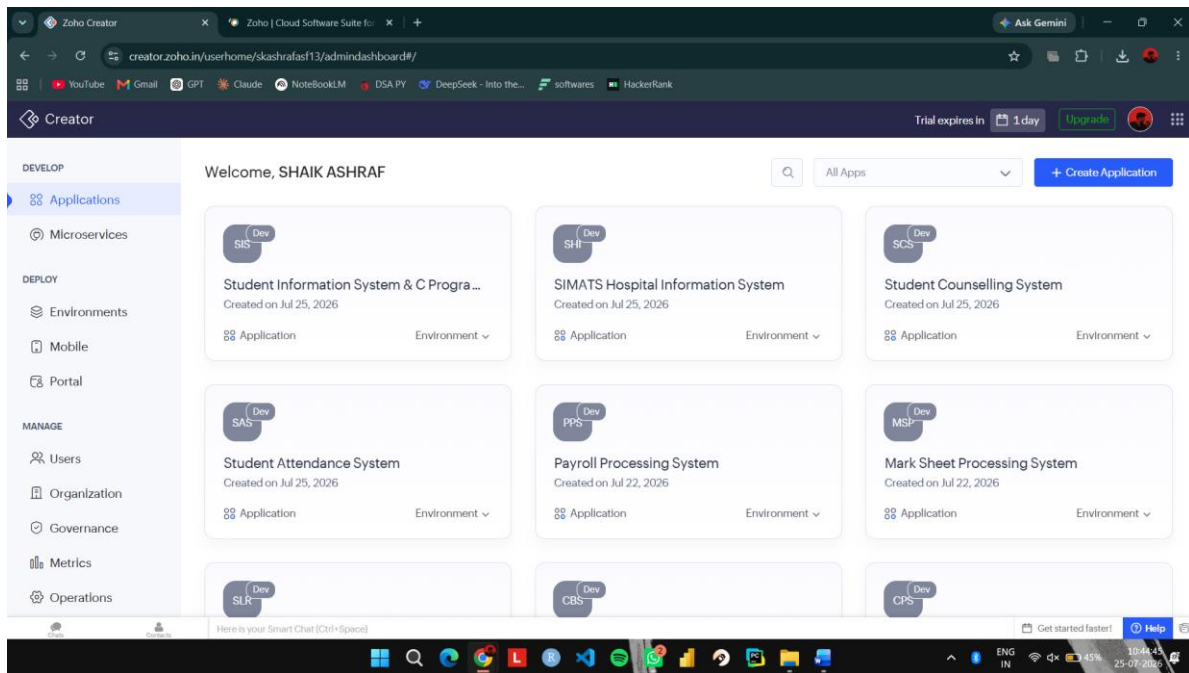

Step 6: Save and publish the application. The software has been created successfully.

IMPLEMENTATION:

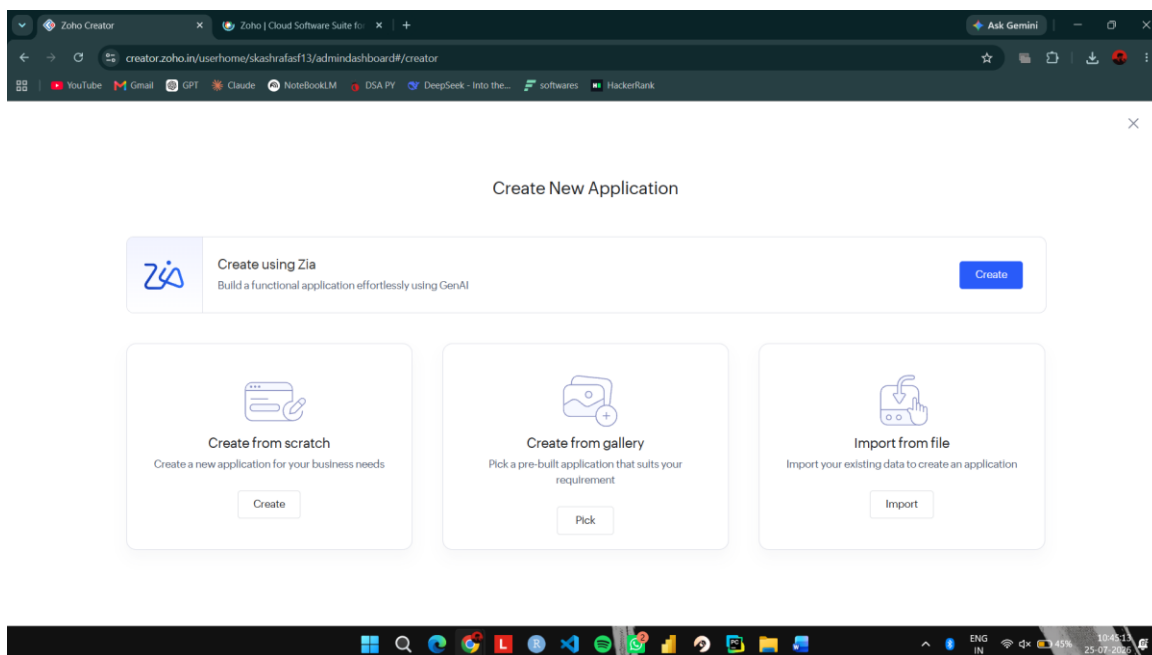

Step 1: Go to www.zoho.com.

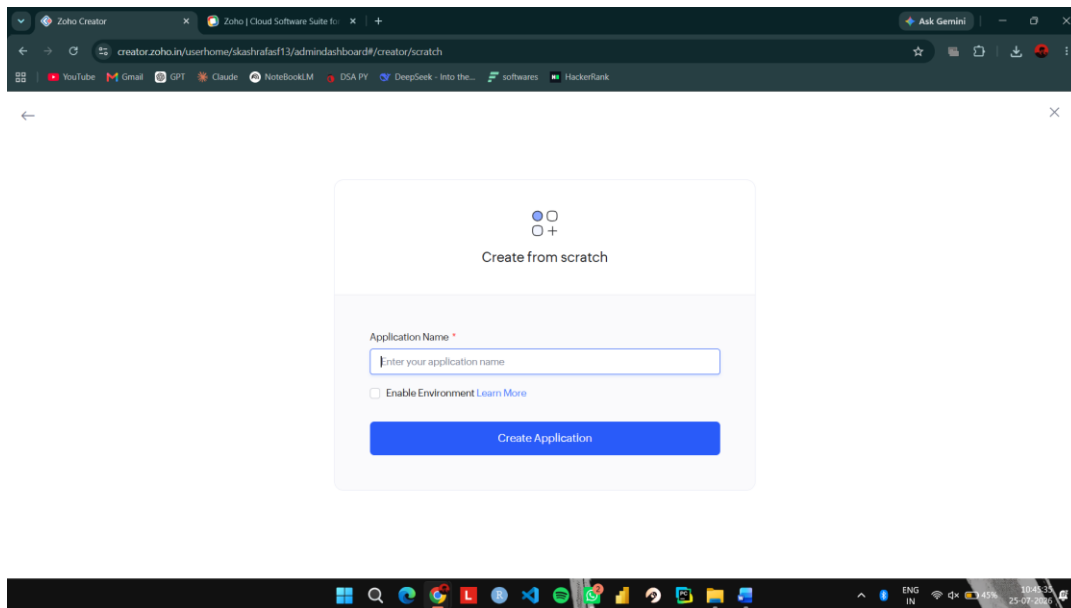

Step 2: Log in to your Zoho account.

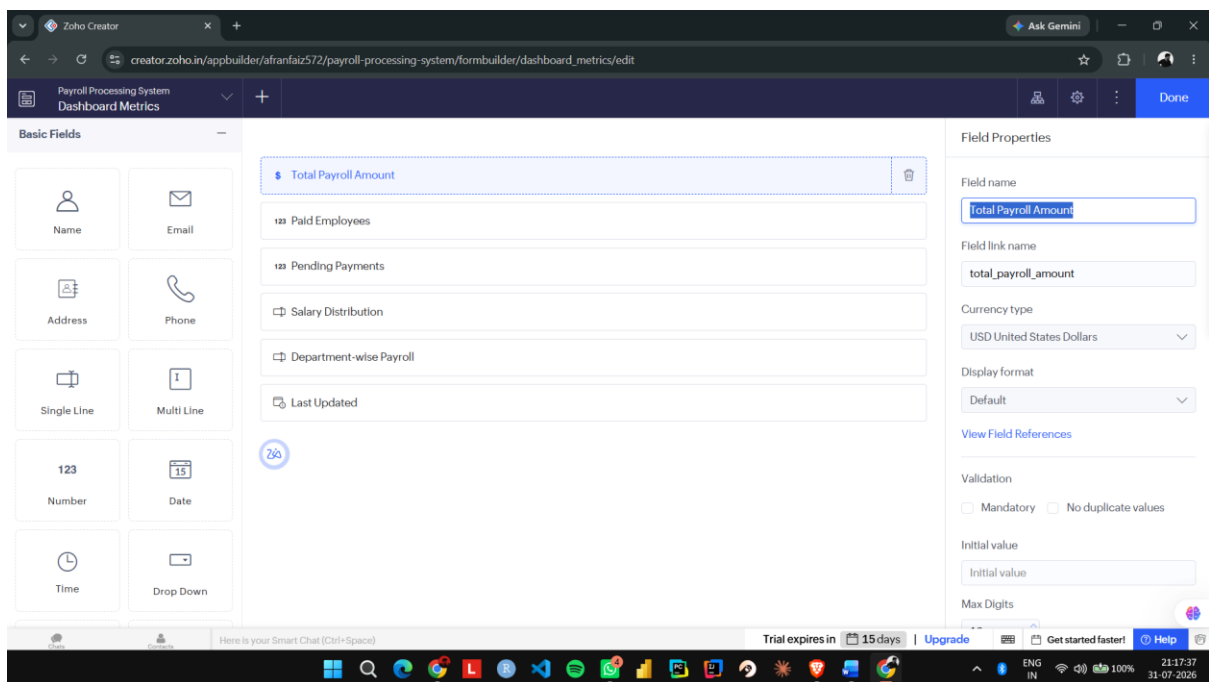

Step 3: Open Zoho Creator and select Create New Application.

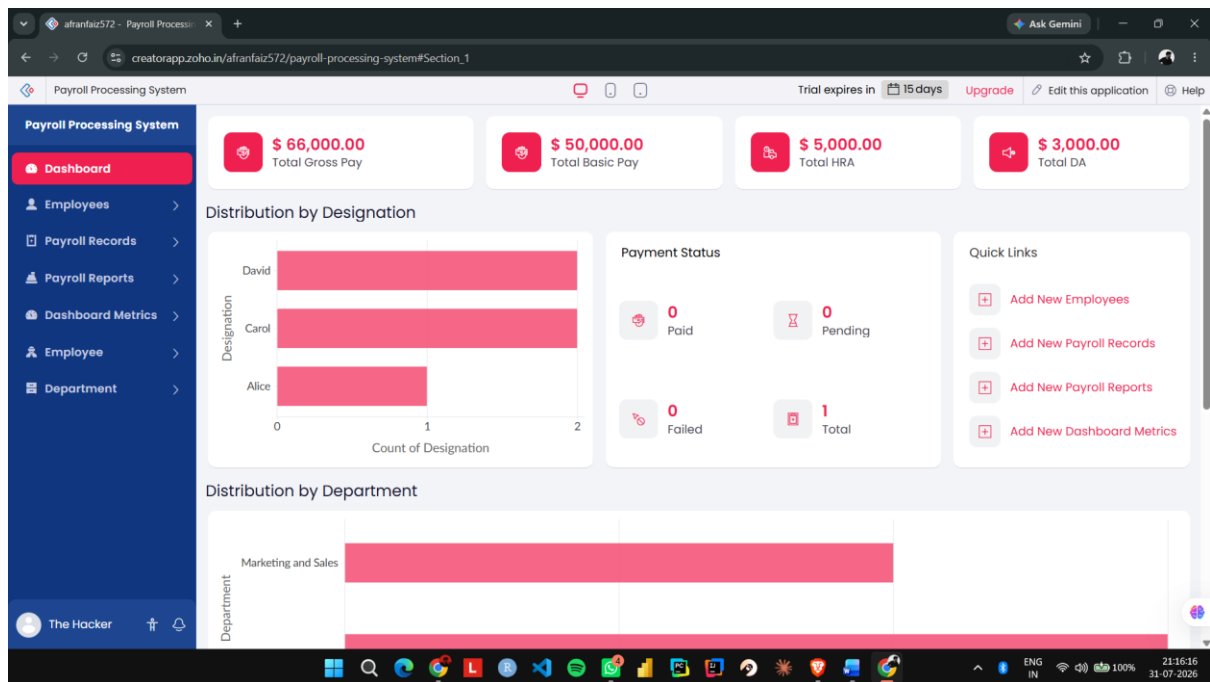

Step 4: Enter the application name as Payroll Processing System.

Step 5: Create the required forms, reports, and dashboard.

Step 6: Save and publish the application. The software has been created successfully.

EXP NO 7: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR STUDENTS ATTENDANCE SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

Aim:

To create a simple cloud software application for Students Attendance System using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure:

Step 1: Go to www.zoho.com.

Step 2: Log in to your Zoho account.

Step 3: Open **Zoho Creator** and select **Create New Application**.

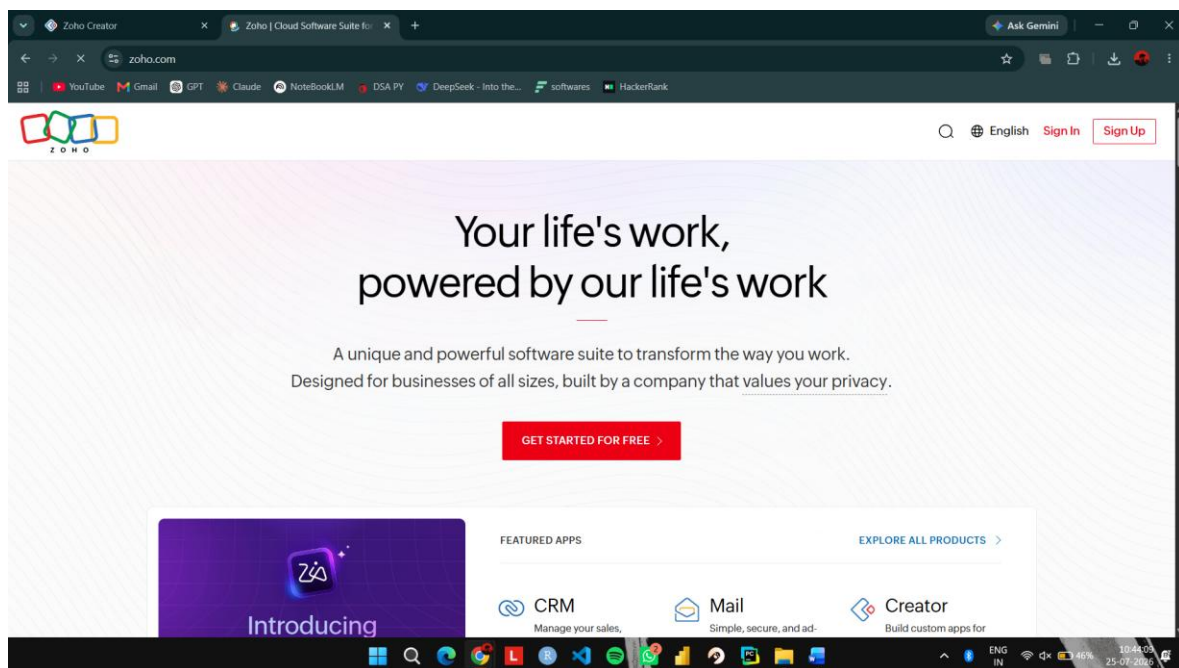

Step 4: Enter the application name as **Students Attendance System**.

Step 5: Create the required forms, reports, and dashboard.

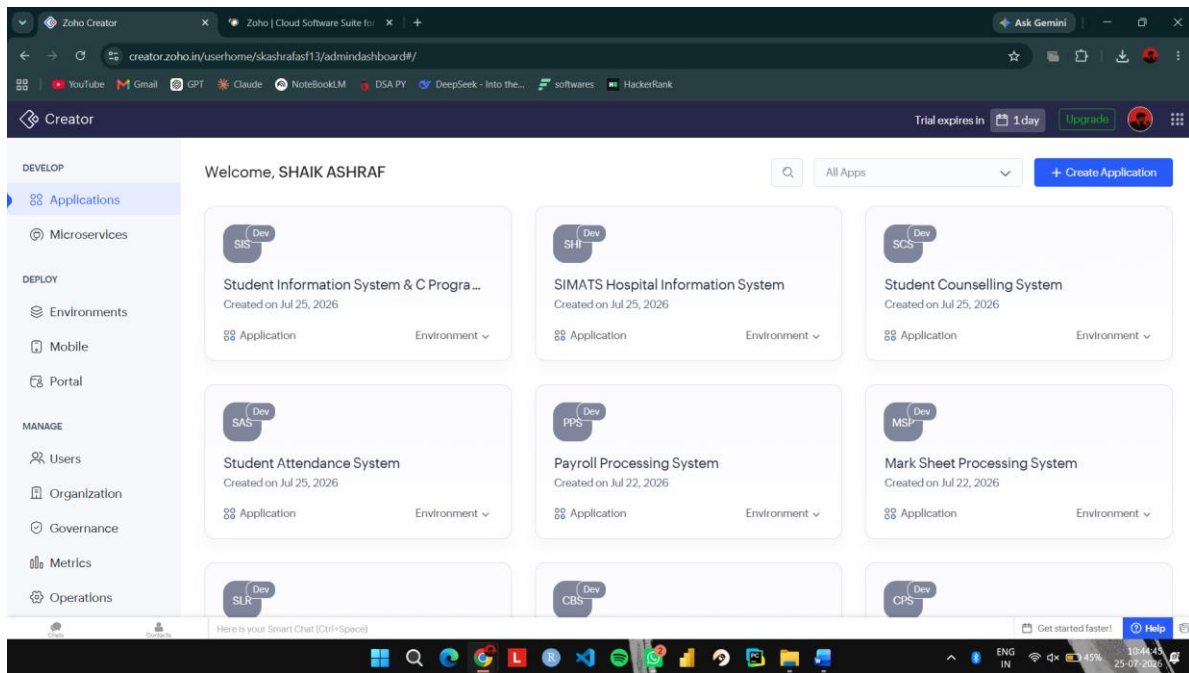

Step 6: Save and publish the application. The software has been created successfully.

IMPLEMENTATION:

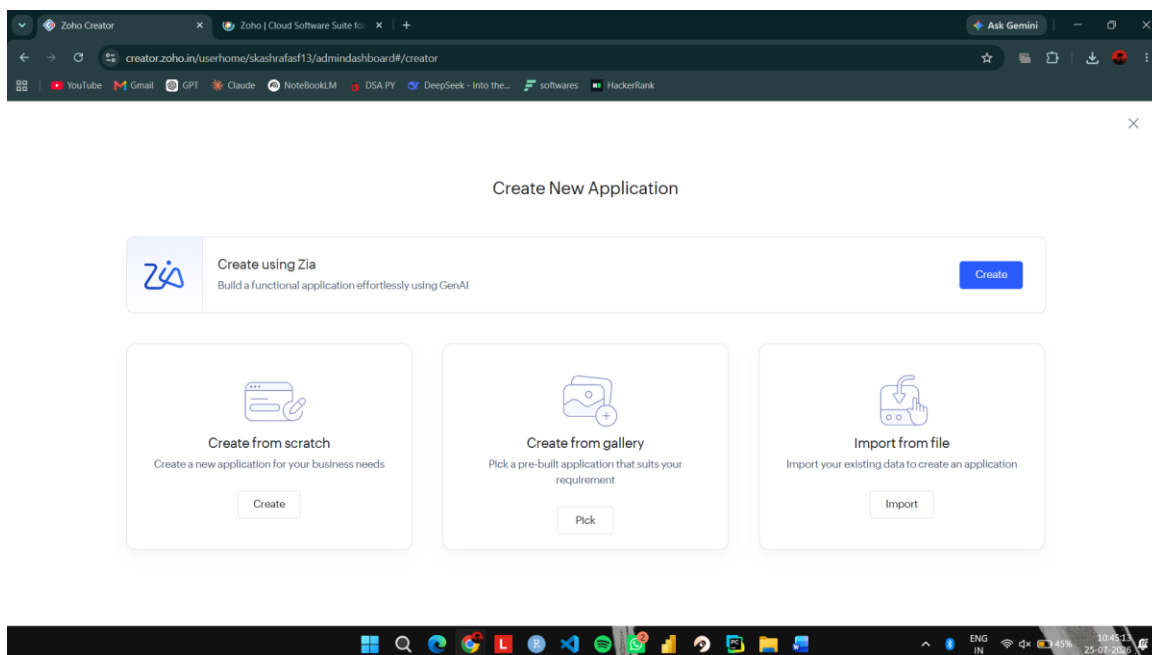

Step 1: Go to www.zoho.com.

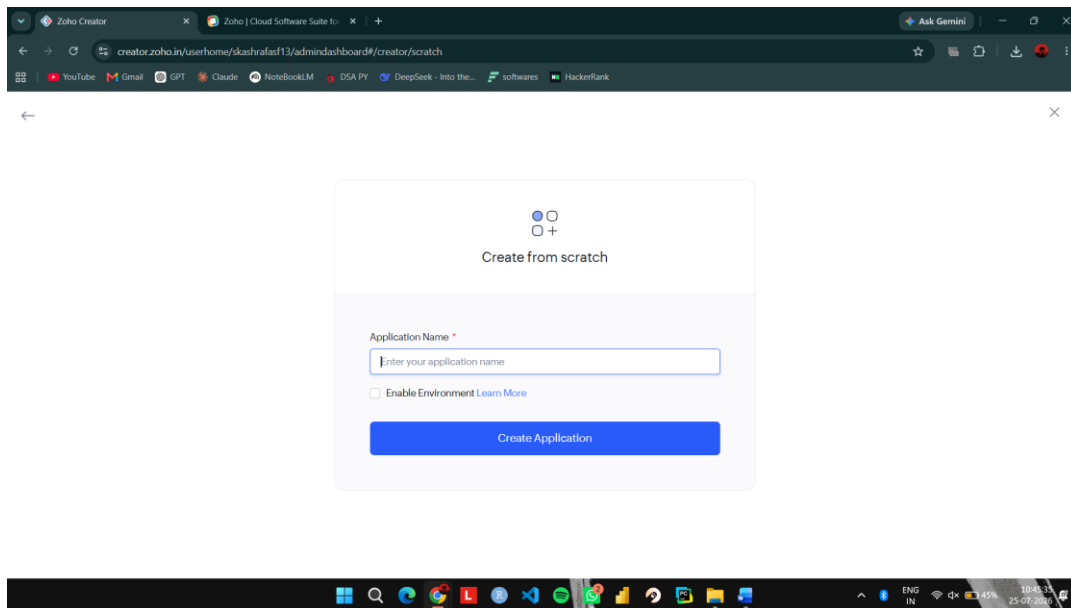

Step 2: Log in to your Zoho account.

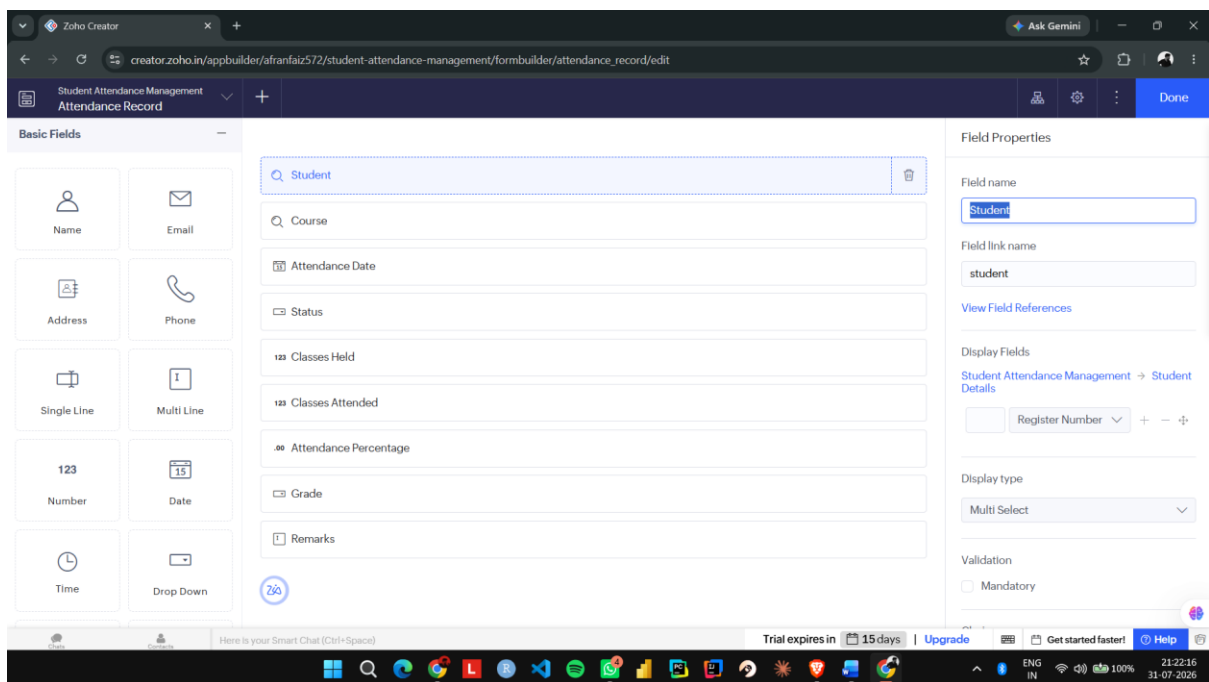

Step 3: Open Zoho Creator and select Create New Application.

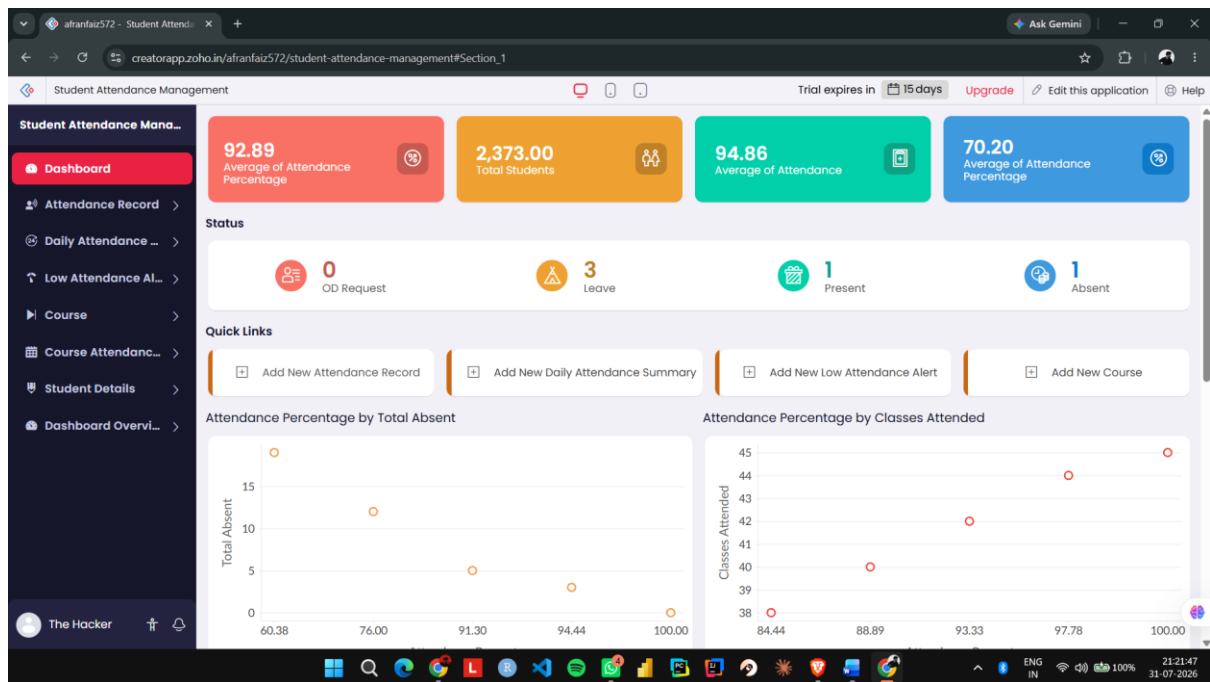

Step 4: Enter the application name as Students Attendance System.

Step 5: Create the required forms, reports, and dashboard.

Step 6: Save and publish the application. The software has been created successfully.

EXP NO 8:CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR STUDENT COUNSELLING SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

Aim:

To create a simple cloud software application for Student Counselling System using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure:

Step 1: Go to www.zoho.com.

Step 2: Log in to your Zoho account.

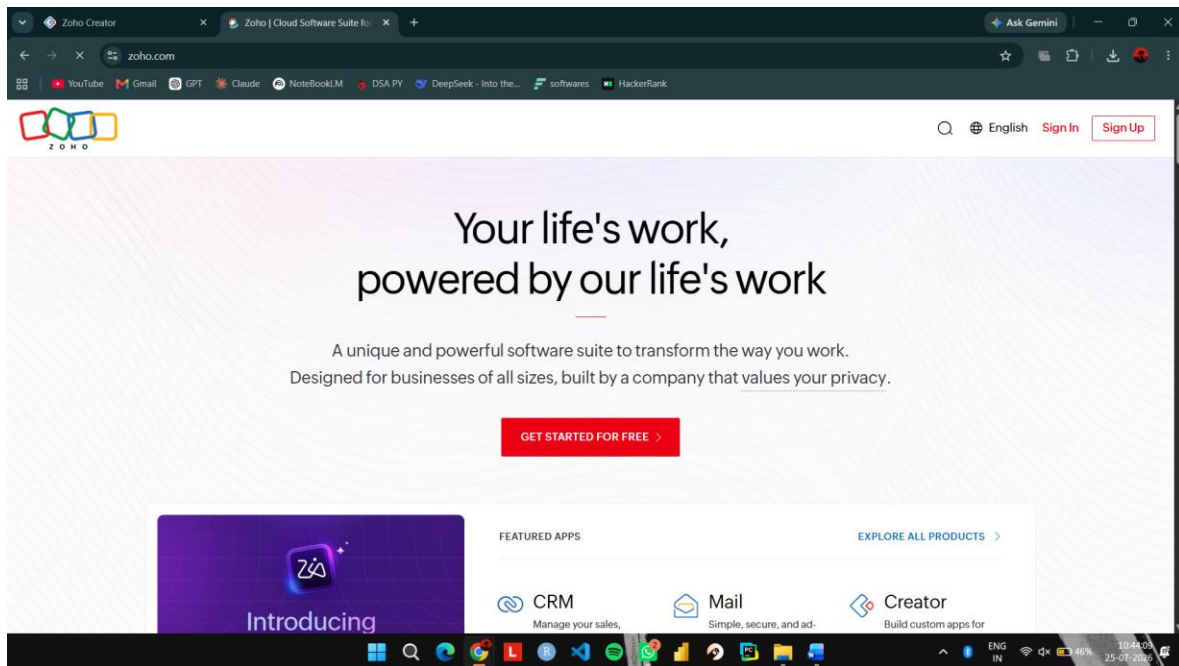

Step 3: Open **Zoho Creator** and select **Create New Application**.

Step 4: Enter the application name as **Student Counselling System**.

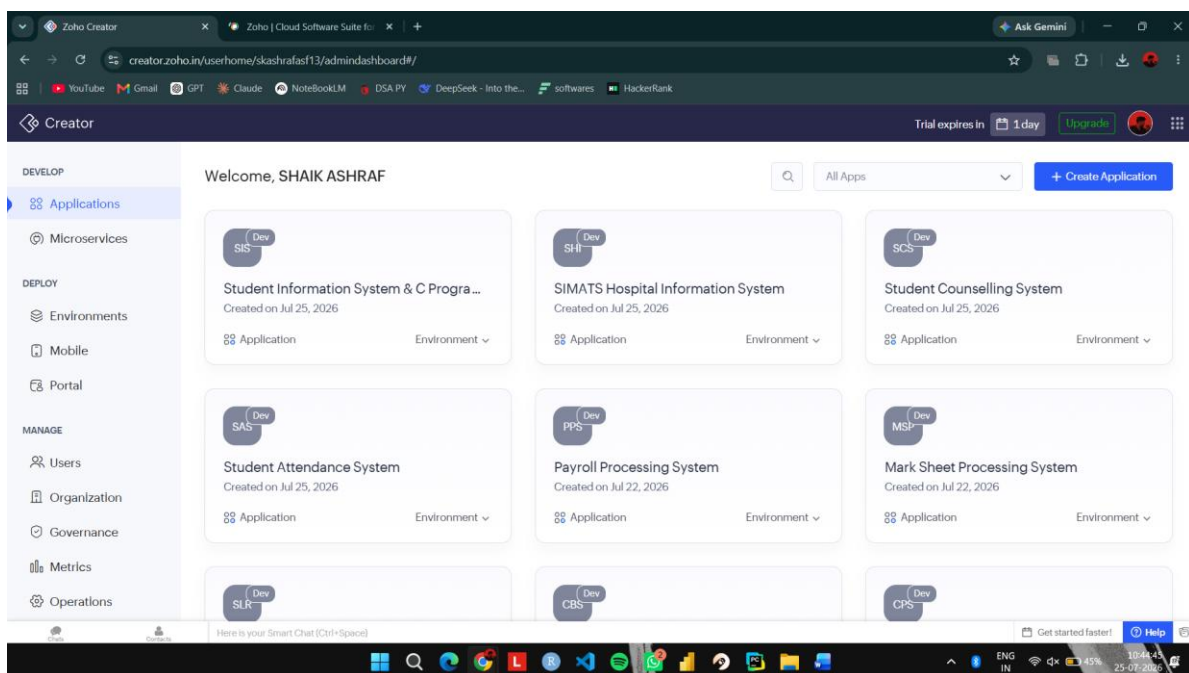

Step 5: Create the required forms, reports, and dashboard.

Step 6: Save and publish the application. The software has been created successfully.

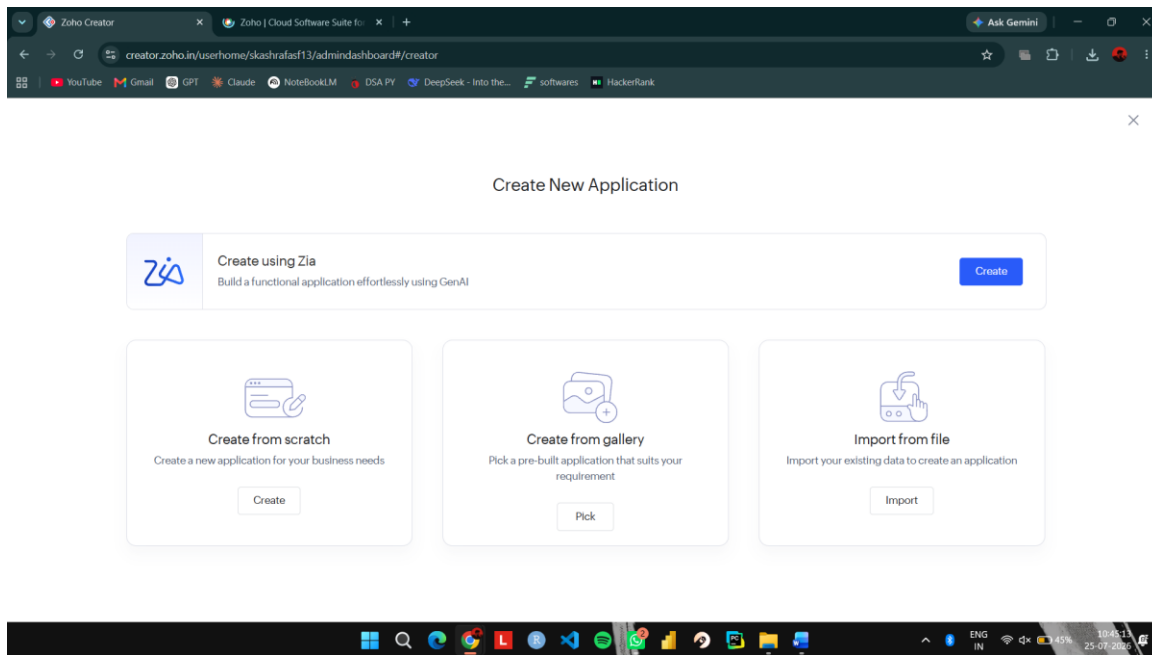

Step 1: Go to www.zoho.com.

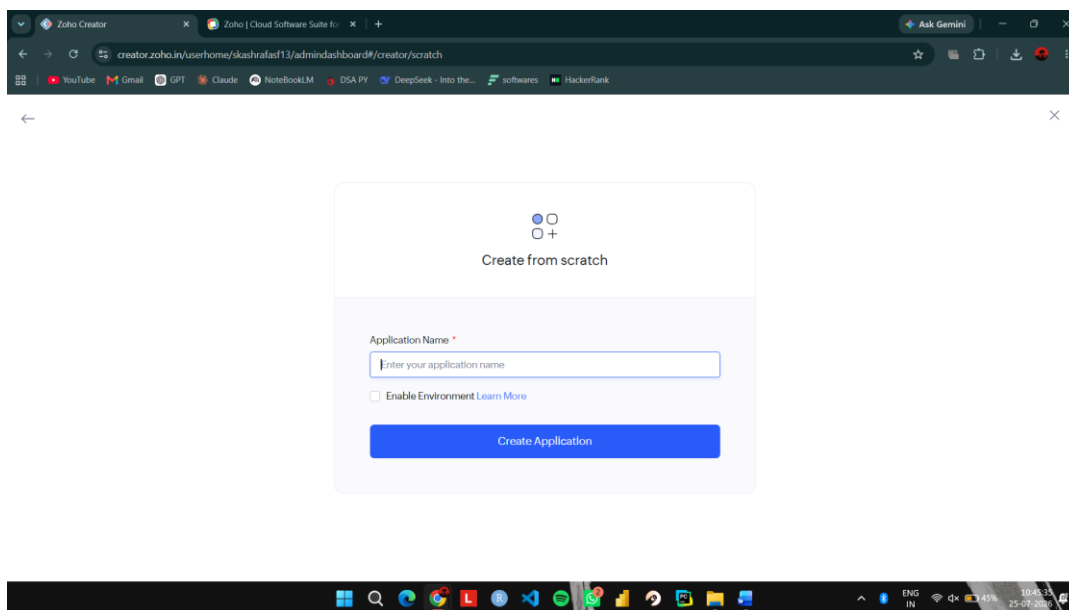

Step 2: Log in to your Zoho account.

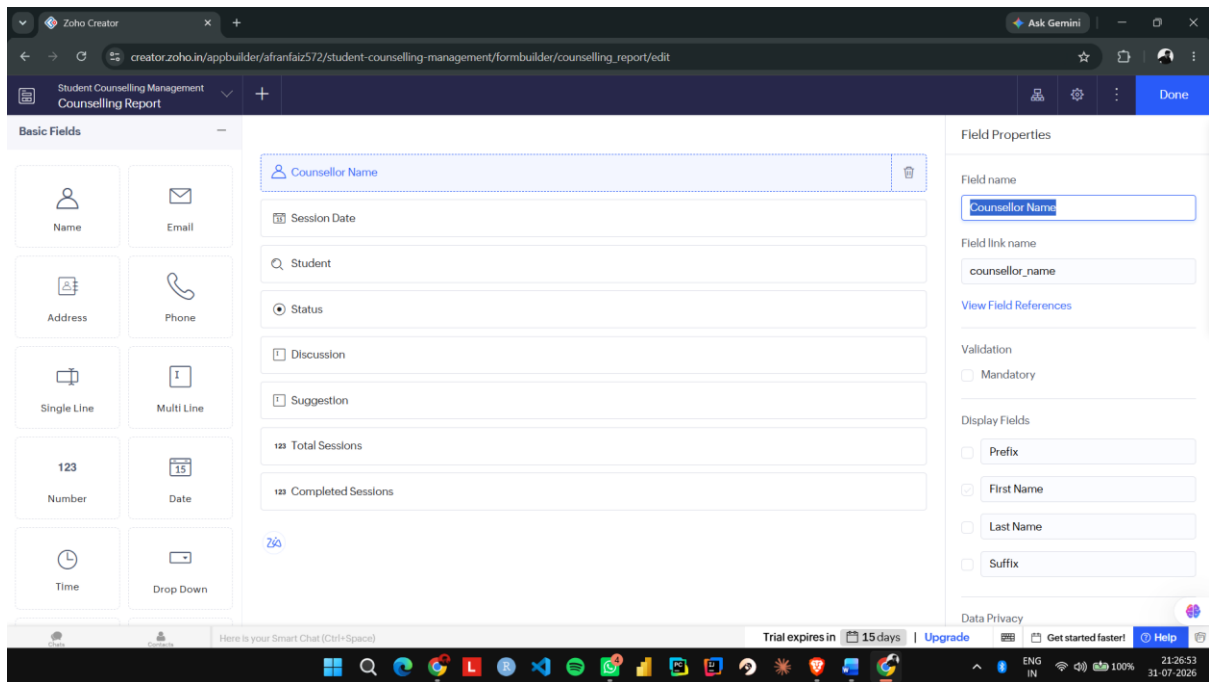

Step 3: Open Zoho Creator and select Create New Application.

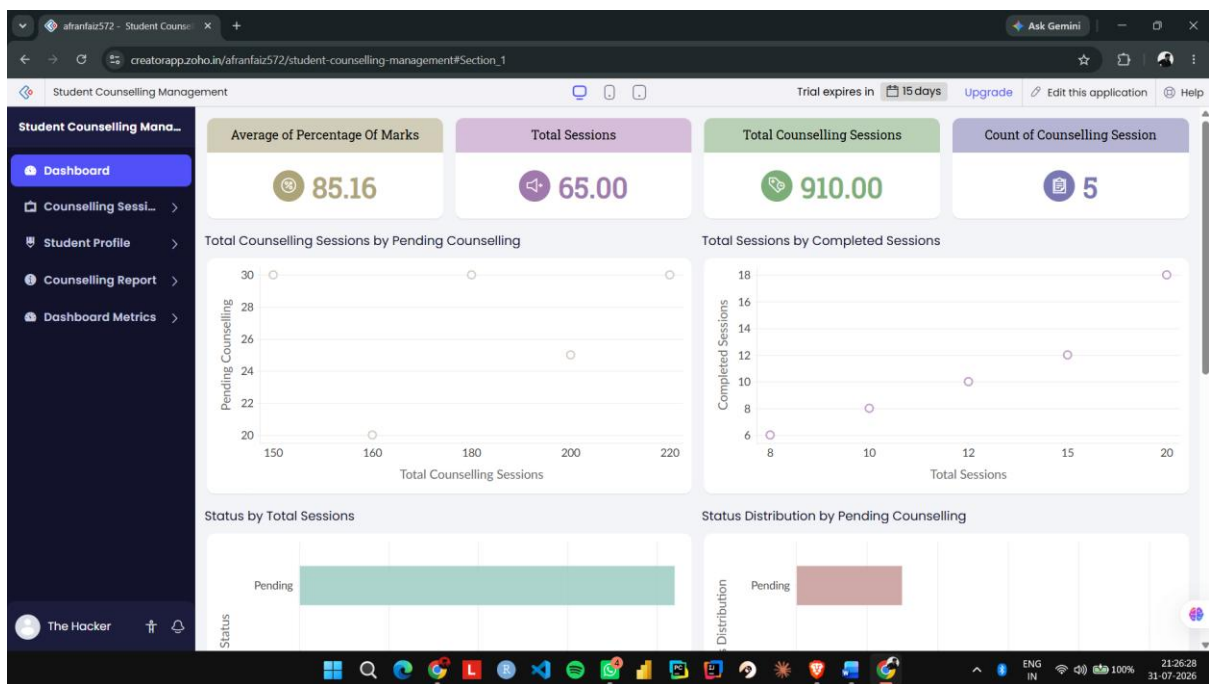

Step 4: Enter the application name as **Student Counselling System.**

Step 5: Create the required forms, reports, and dashboard.

Step 6: Save and publish the application. The software has been created successfully.

EXP NO 9: CREATE A SIMPLE CLOUD SOFTWARE

APPLICATION FOR HOSPITAL INFORMATION SYSTEM FOR SIMATS HOSPITAL USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

Aim:

To create a simple cloud software application for **Hospital Information System for SIMATS Hospital** using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure:

Step 1: Go to www.zoho.com.

Step 2: Log in to your Zoho account.

Step 3: Open **Zoho Creator** and select **Create New Application**.

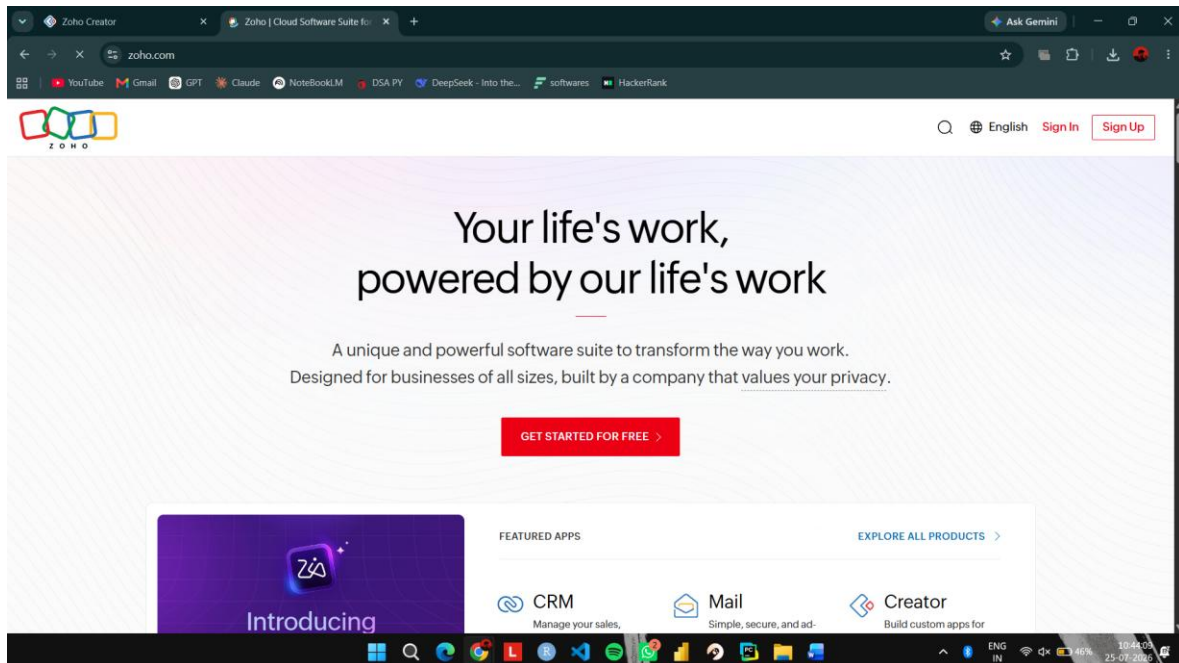

Step 4: Enter the application name as **Hospital Information System**.

Step 5: Create the required forms, reports, and dashboard.

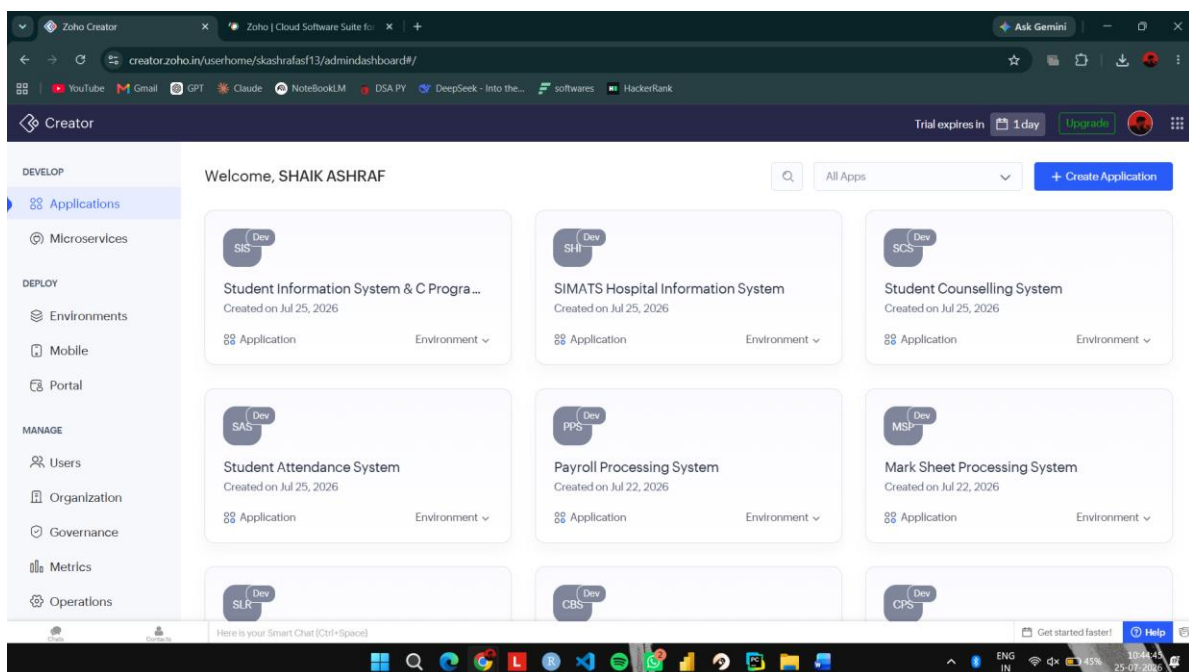

Step 6: Save and publish the application. The software has been created successfully.

IMPLEMENTATION:

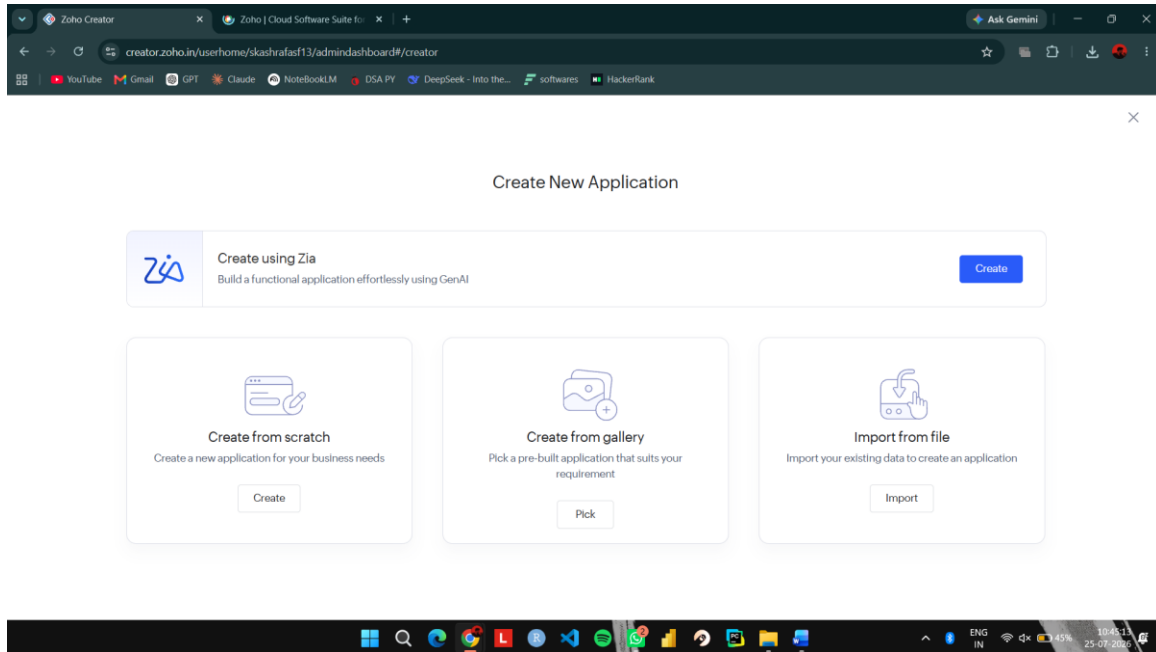

Step 1: Go to www.zoho.com.

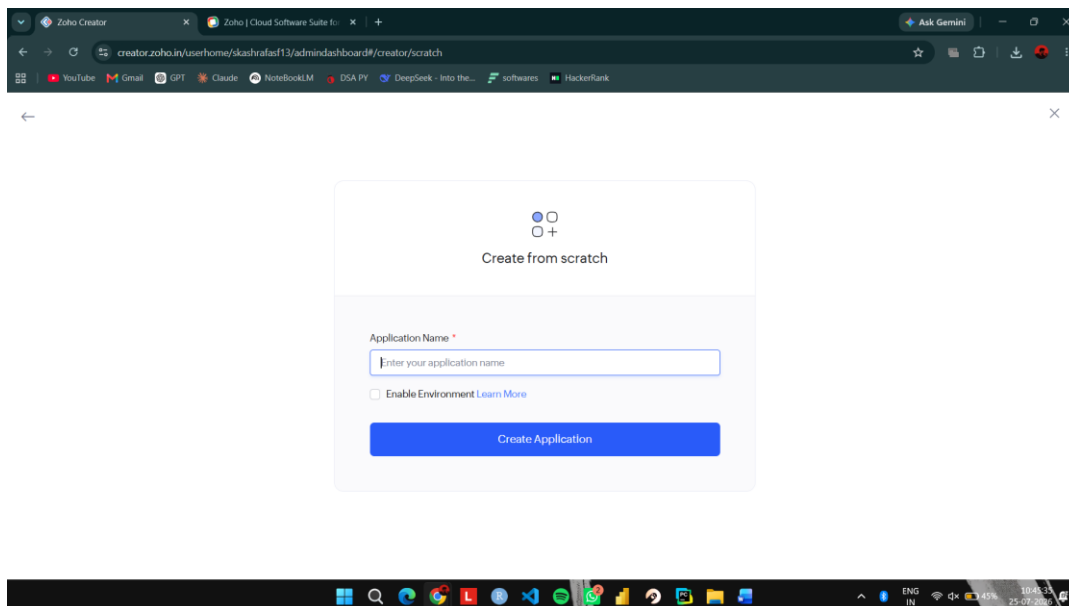

Step 2: Log in to your Zoho account.

Step 3: Open **Zoho Creator** and select **Create New Application**.

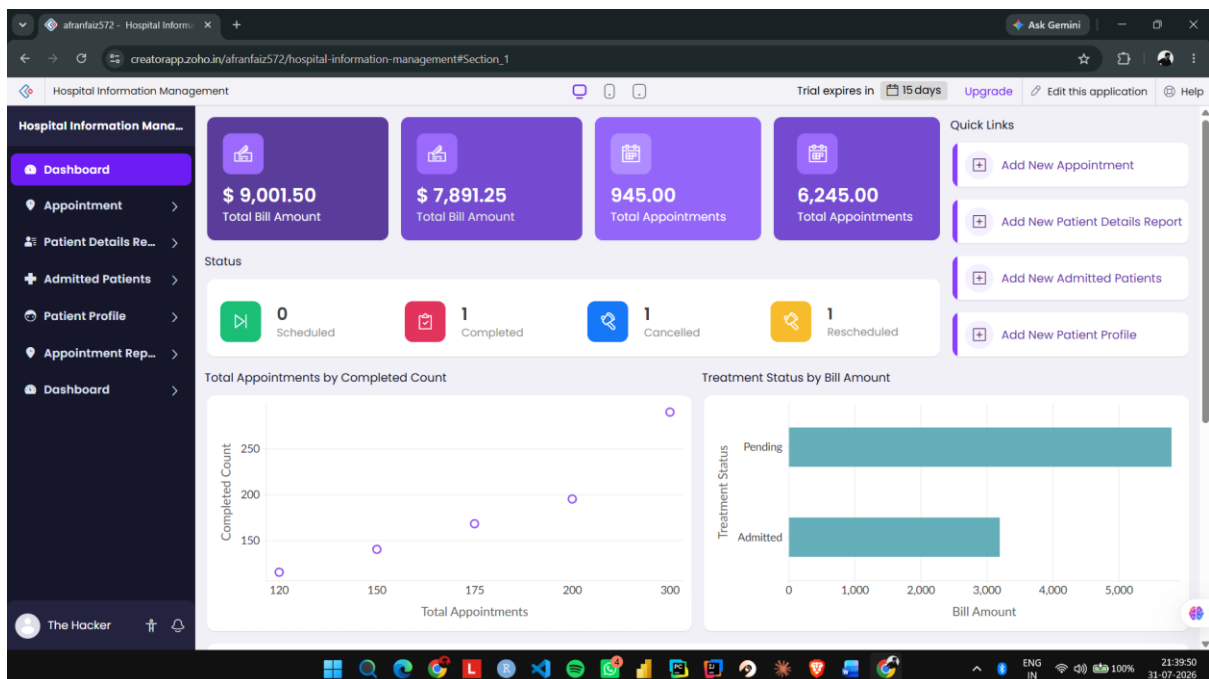

Step 4: Enter the application name as **Hospital Information System**.

Step 5: Create the required forms, reports, and dashboard.

The screenshot shows the Zoho Creator interface for editing a form titled 'Admitted Patients'. On the left, a 'Basic Fields' panel lists various field types: Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, and Drop Down. The main workspace displays a form with fields for Patient (with a search icon), Department, Admission Date, Discharge Date, Treatment Status, Bill Amount, and Doctor Name. On the right, the 'Field Properties' panel is open for the 'Patient' field, showing its name, link name ('patient'), display fields (Hospital Information Management → Patient Profile), display type (Multi Select), and validation options (Mandatory).

Step 6: Save and publish the application. The software has been created successfully.

EXP NO 10: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR STUDENT INFORMATION MANAGEMENT SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

Aim:

To create a simple cloud software application for **Student Information Management System** using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure:

Step 1: Go to www.zoho.com.

Step 2: Log in to your Zoho account.

Step 3: Open **Zoho Creator** and select **Create New Application**.

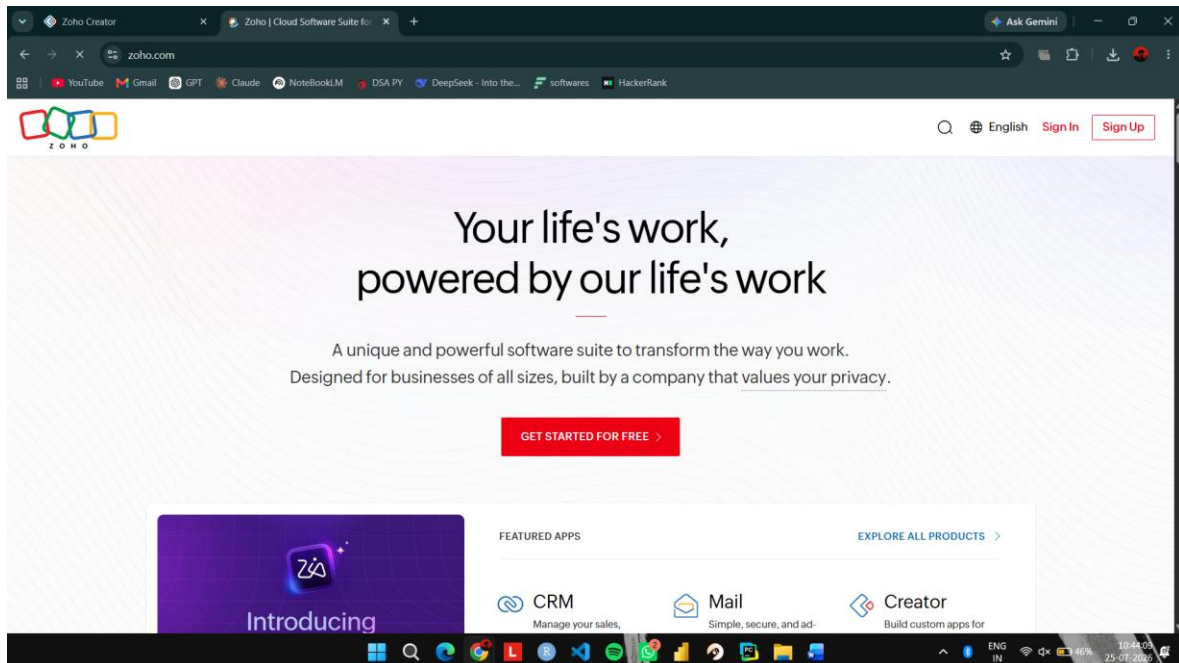

Step 4: Enter the application name as **Student Information Management System**.

Step 5: Create the required forms, reports, dashboard, and C Program Submission form.

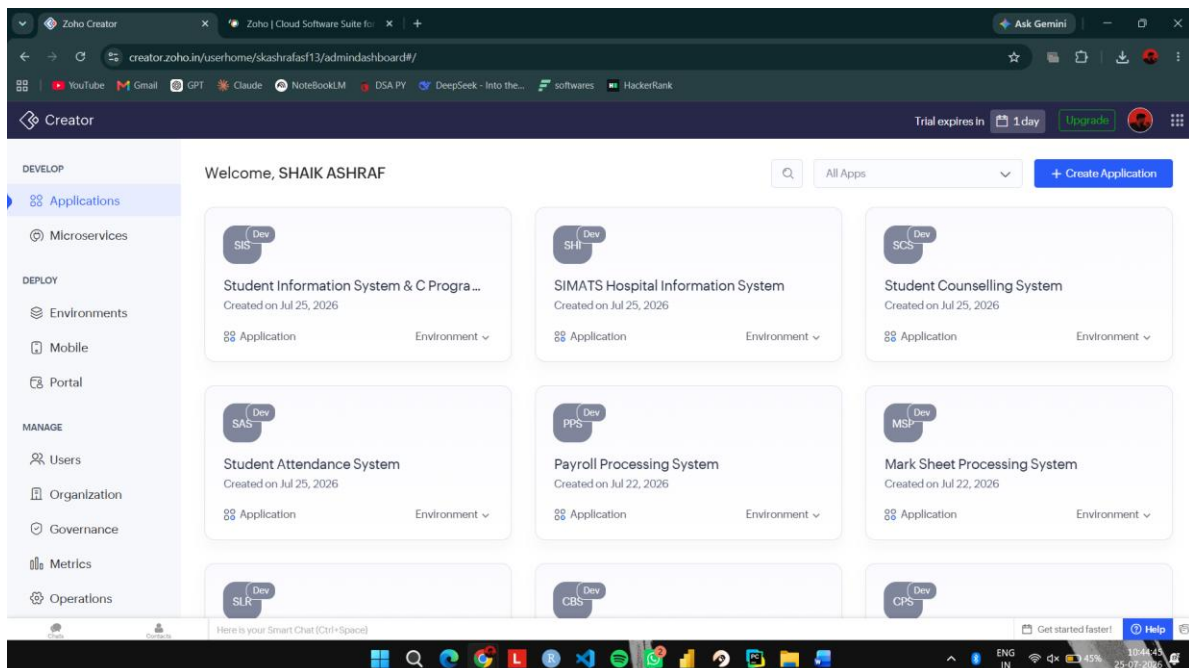

Step 6: Save and publish the application. The software has been created successfully.

IMPLEMENTATION:

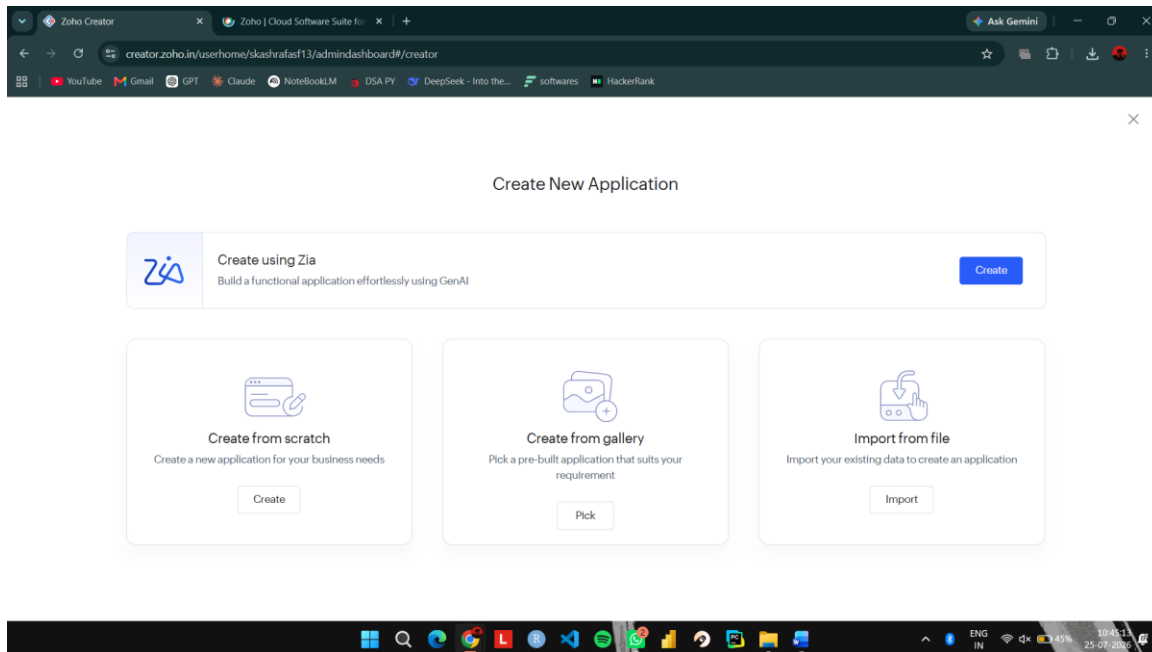

Step 1: Go to www.zoho.com.

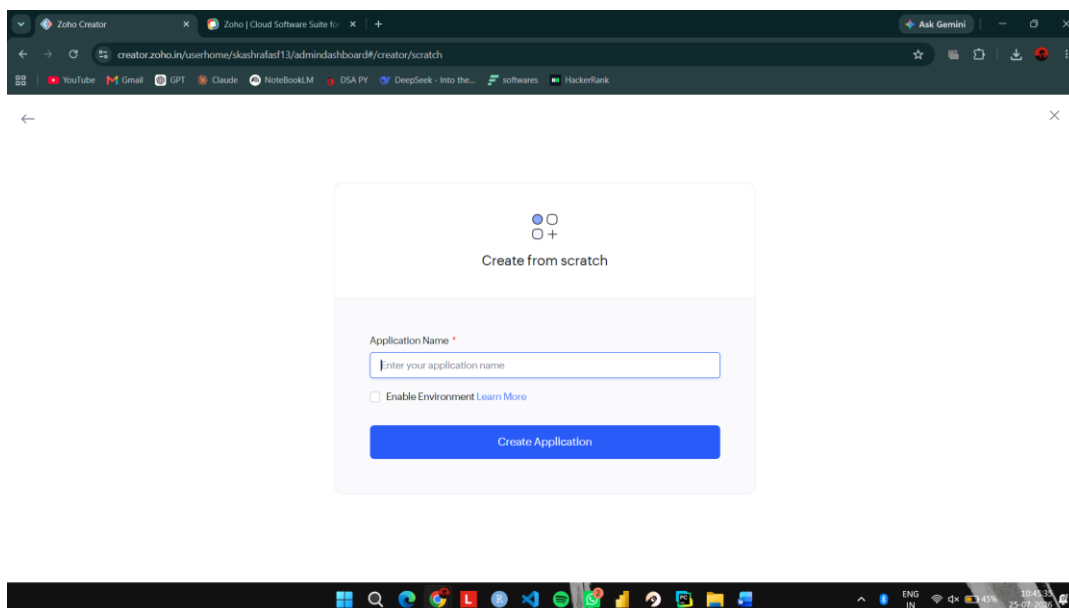

Step 2: Log in to your Zoho account.

Step 3: Open Zoho Creator and select Create New Application.

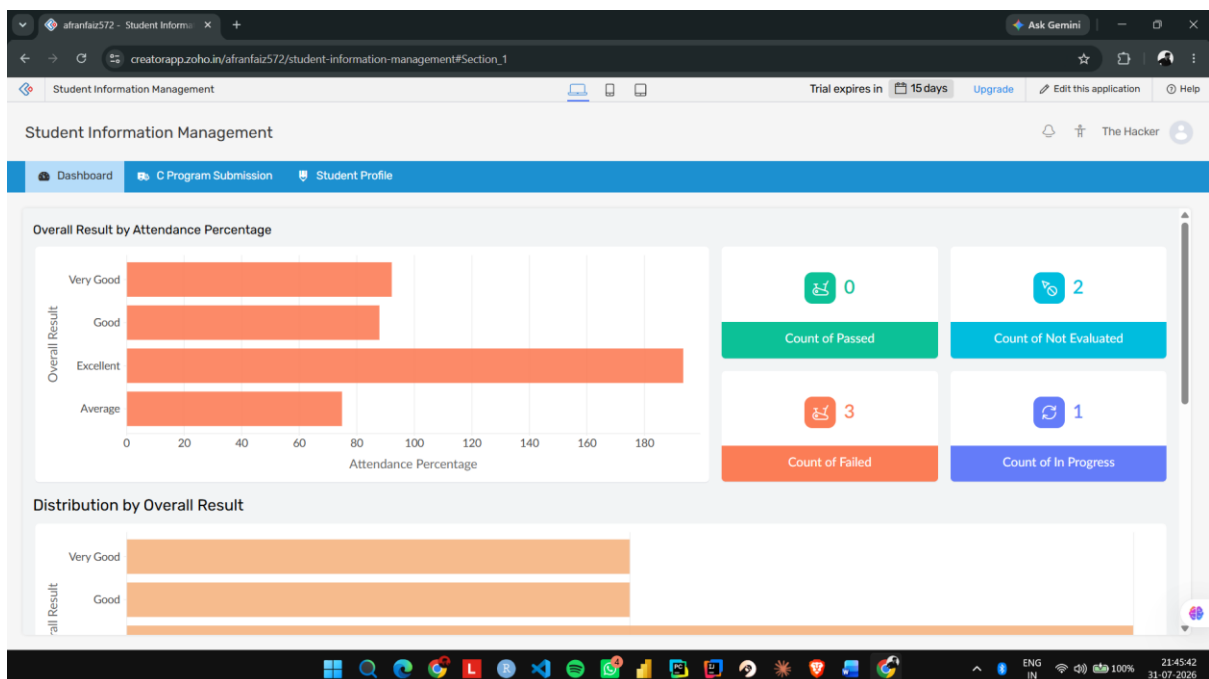

Step 4: Enter the application name as Hospital Information System.

Step 5: Create the required forms, reports, dashboard, and C Program Submission form.

The screenshot shows the Zoho Creator form builder interface for a form titled 'Student Information Management'. The left sidebar contains 'Basic Fields' with icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, and Drop Down. The main area displays the form structure with fields: Student (with a search icon), Program Title, Submission Date, Marks Awarded, and Evaluation Status. The right sidebar shows 'Field Properties' for the 'Student' field, including Field name (Student), Field link name (student), Display Fields (Student Information Management → Student Profile), Display type (Multi Select), and Validation (Mandatory).

Step 6: Save and publish the application. The software has been created successfully.

EXP NO 11: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR ONLINE SUPER MARKET SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

Aim:

To create a simple cloud software application for Online Super Market System using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure:

Step 1: Go to www.zoho.com.

Step 2: Log in to your Zoho account.

Step 3: Open **Zoho Creator** and select **Create New Application**.

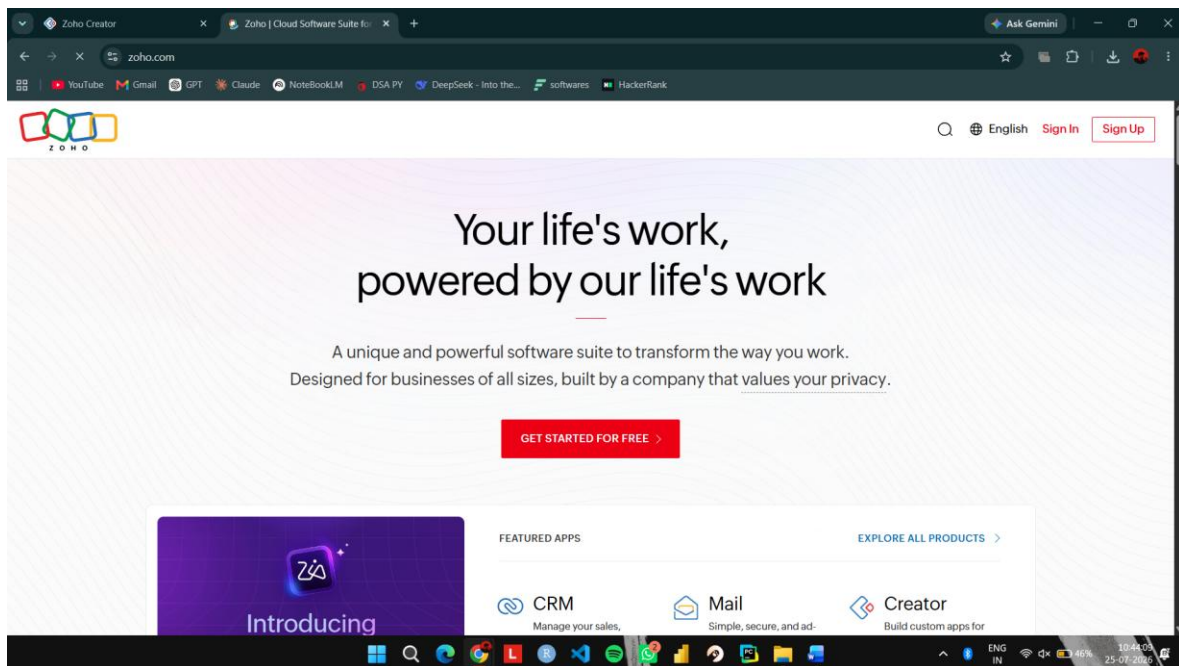

Step 4: Enter the application name as **Online Super Market System**.

Step 5: Create the required forms, reports, and dashboard.

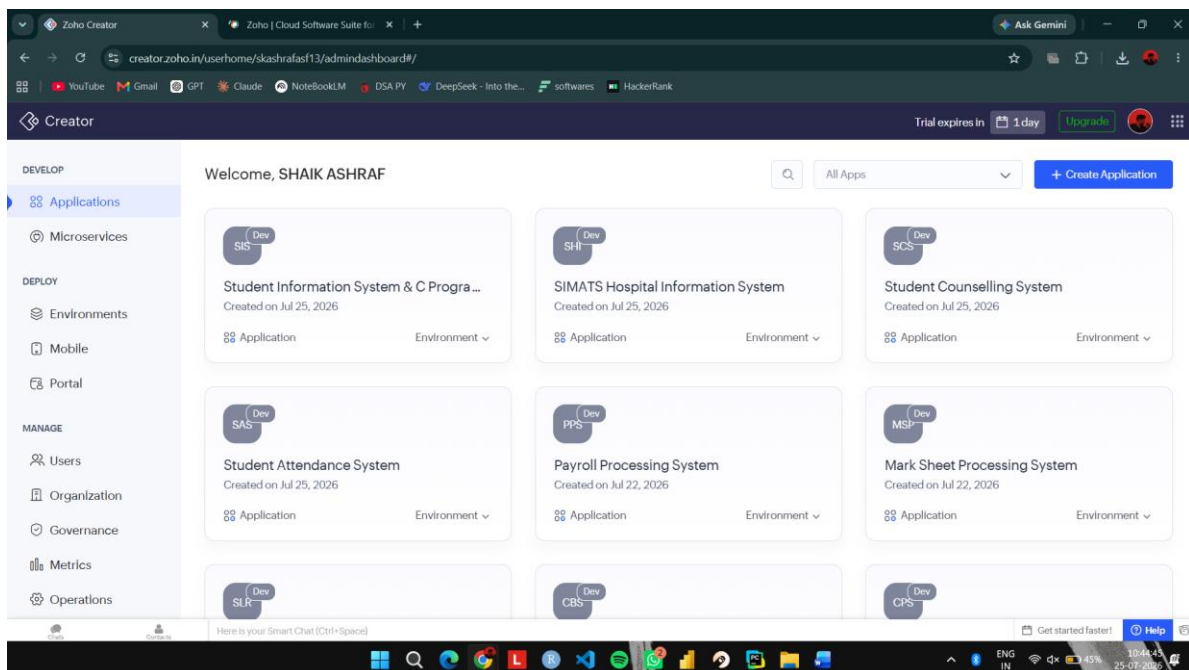

Step 6: Save and publish the application. The software has been created successfully.

IMPLEMENTATION:

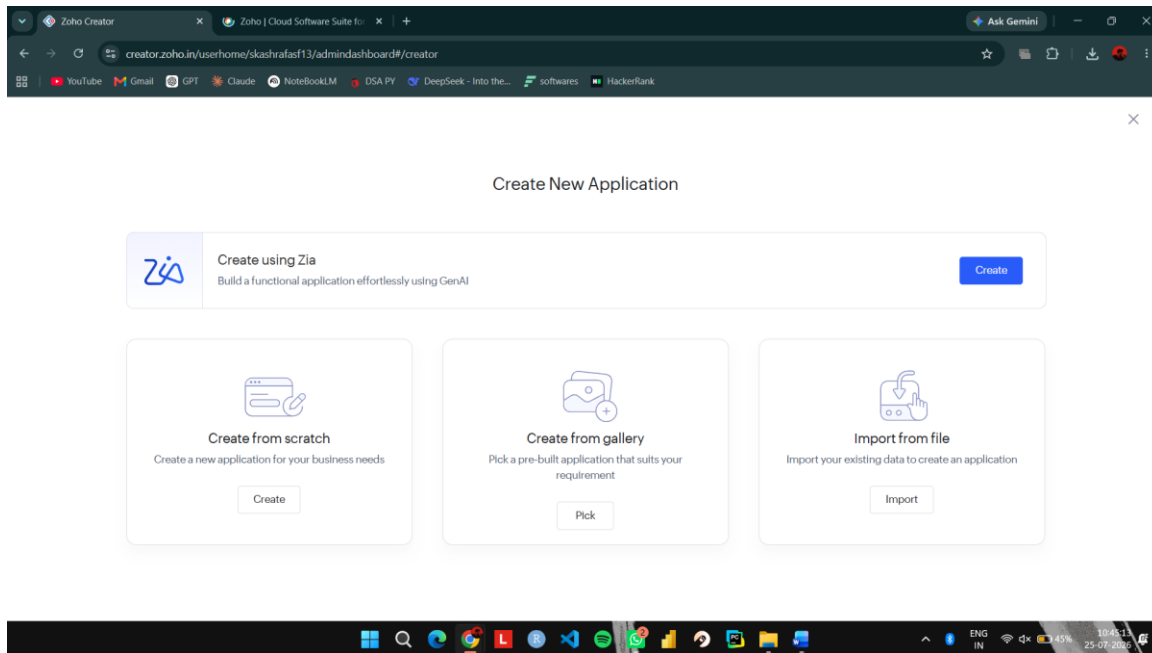

Step 1: Go to www.zoho.com.

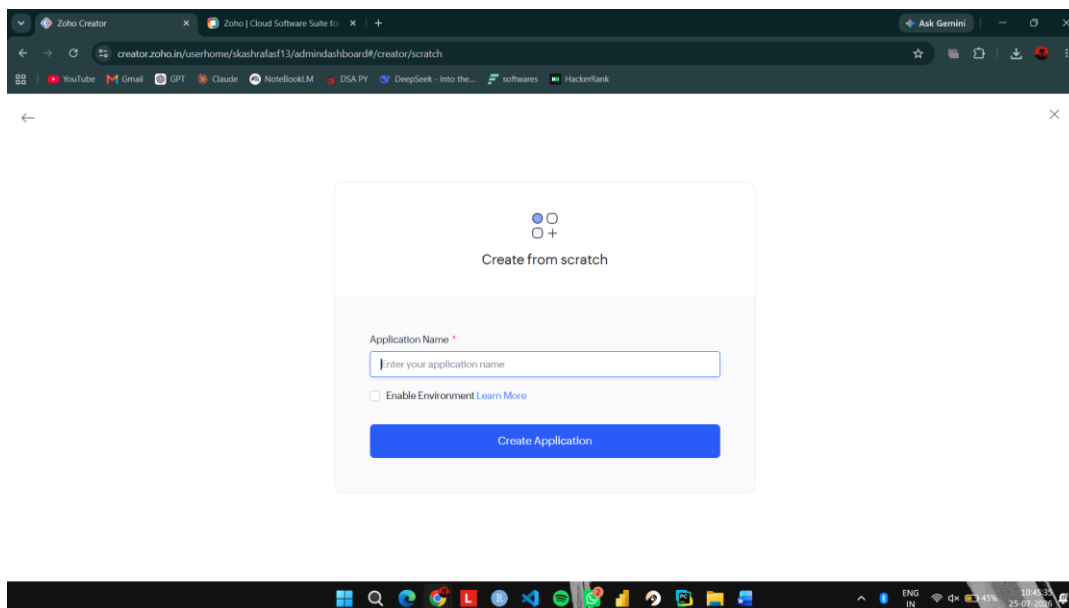

Step 2: Log in to your Zoho account.

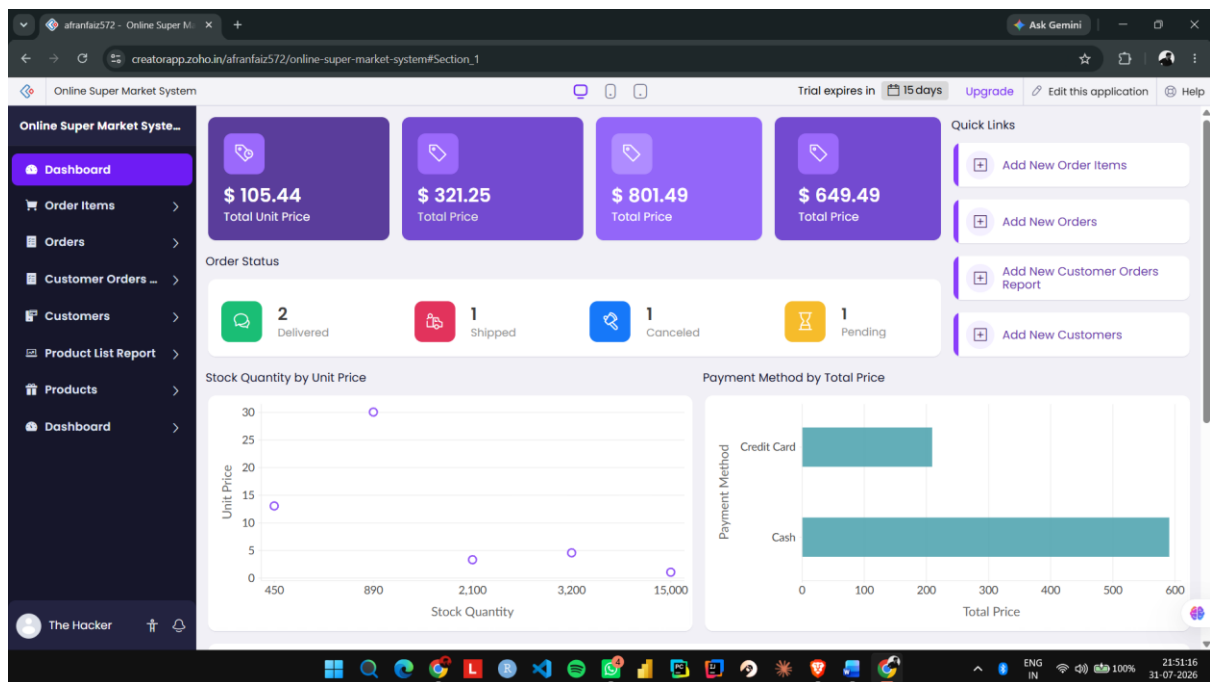

Step 3: Open Zoho Creator and select Create New Application.

Step 4: Enter the application name as Hospital Information System.

Step 5: Create the required forms, reports, and dashboard.

Step 6: Save and publish the application. The software has been created successfully.
